

Example 2.*Solution :*

1 bag of pop-corn cost 5 cents.

2 bags of pop-corn cost 2 times 5 cents = 10 cents.

She spent altogether 9 cents + 10 cents =
19 cents.**Example 3.***Analysis :*

How much he had left	{	What he had at first	{	What he earned in 1 day, \$3.
				Number of days he worked, 6.
	{	What he spent	{	Hat, \$2.
			Shoes, \$5.	
			Coat, \$4.	

Example 3.*Solution:*

In 1 day he earned 3 dollars.

In 6 days he earned 6 times 3 dollars =
18 dollars.He spent 2 dollars + 5 dollars + 4 dollars =
11 dollars.

He had left 18 dollars - 11 dollars = 7 dollars.
