### HAMILTON HAPPENINGS

### HAMILTON POWERLESS IN STORM KING'S GRIP

### Worst Blizzard in Years Demoralized Street Cars—C.N.R.'s Plans Well Received.

HAMILTON, Feb. 21.—(Special.)—In full regalia and with his retinue of wind, snow, sleet, rain and sleet, storm king visited Hamilton to-day. He arrived early this morning before the city was awake, and prolonged his visit until a late hour to-night. The storm was the worst known here in years. Besides the heaviest fall of snow this winter, the wind blew a terrific gale, and at times reached a velocity of 40 miles an hour, driving the snow, and occasionally sleet, before it into the faces of pedestrians in stinging eddies, which made it almost impossible for them to see their way. Immense drifts of snow formed and effectually tied up all vehicular traffic this afternoon, and almost put the street car service out of business. The street car people, however, struggled heroically and by pressing their snow-sweepers into service and running their cars in double-headers, managed to get the high-velocity snow off the streets. The high-velocity snow was not the only trouble in this respect being encountered in the Burlington line, at the beach, where the wind has a clean sweep across the ice, and piles the snow up into small mountains. An irregular service has been kept up on all the radials, however, and cars are running all night in an effort to keep the lines open, while the same thing is being done in the city.

**Piled Snow High**  
In the city to-night the snow drifts in some places are six feet deep. The storm has proved such a disagreeable obstacle to walking, that with few exceptions, only those people whose business made it necessary for them to venture forth, left their homes to-night, and at an early hour this evening the streets were almost deserted.

**Firemen Called Out**  
While the storm raged at its height to-night, the firemen were called out to two small blazes, which they found it hard work to reach. At 8:15 this evening a fire started in the workshop of W. Chapple, a tinsmith at 332 North James-st., but was extinguished with a loss of \$200 or less. While the firemen were at this blaze, another alarm called them to the residence of F. F. Dalley, 206 West Main-st., but this fire was also put out before any great damage was done.

**C. N. R. Plans**  
Plans for the proposed route of the Canadian Northern Railway thru the City of Hamilton were laid before the board of control to-day by a delegation of the company's officials, headed by W. H. Moore, secretary. The controllers seemed very much pleased with the plans and particularly with the showing of only one level crossing in the principal part of the city thru which the railway company proposed to run its line.

According to the plans the line will enter the west end of the city on the route of the proposed Hamilton, Waterloo and Guolph Electric Railway, thirty feet above the Grand Trunk, taking twenty feet off the north side of Harvey Park, and skirting Dundas Park. From Finchbury-street the line runs slightly southeast, crossing Barton-street at Locomotive. At Queen-street it turns northeast and continues in that direction until Ferrie-street is reached, when it runs easterly into the manufacturing annex.

The station will be located on the northwest corner of James and Murray-streets, both of which thoroughfares will be crossed on trestle work, as will all the other streets along the route, except King-street, which will be crossed on the level. A fine foot-crossing on James-street at the railway crossing as asked for by the company. The James-street station will probably be an "L" shaped structure, six stories high. Another station in the manufacturing district will probably be built at Sherman-avenue, and the freight sheds will be located in the block bounded by Mary, Ferrie, Ferguson and Simcoe-streets to-day that this Mr. Moore stated to-day that his

company was playing a lone hand from coast to coast, and would not consider the proposition of a Union Station in Hamilton. The company's construction work is expected to be finished here within a year from now.

## NERO PATRIOT BESIDE JUDGES

So Roosevelt Says in Address at Columbus — Should Be Able to Recall Judiciary Members.

COLUMBUS, Ohio, Feb. 21.—(Special.)—Recommendations that judges be subject to removal by popular vote and that the judgment of a court declaring any statute to be unconstitutional should be subject to reversal by a referendum, together with a vigorous denunciation of the highest courts in the country, for their recent rulings in the Workmen's Compensation Acts, were among the salient features of an address delivered this morning by Col. Theodore Roosevelt, before the Ohio Constitutional Convention.

Under the present constitution, a convention may be called at the end of every 20-year period, which may submit to the people a new constitution to become effective when adopted by a majority of the people. Much interest attaches to the present convention, because of the progressive policies which have come to the front during the past few years, and have made a deep impression upon the people of Ohio. Col. Roosevelt is a leading progressive, and his recommendations as to the new constitution have been eagerly anticipated. To-day he declared himself in favor of the initiative, the referendum and the recall of officials, including judges.

Government Regulation. The trust evil was also discussed at length, and a government regulation of the big corporations and governmental control of prices were suggested as the only effective remedies. Col. Roosevelt also declared himself in favor of the "secret ballot" for the direct nomination of presidential candidates, and the election of United States senators by the people. He believed that judges should be liable to removal from office by a majority vote of the legislature, and by the "recall," and with these safeguards saw no reason why they might not be appointed for long terms of service.

The speech bristled with epigrammatic sentences. Referring to the action of the supreme courts of Missouri and California respectively, in reversing the judgments of conviction secured against the municipal bondholders in St. Louis and San Francisco, he said: "Nero fiddling over burning Rome was a patriot and a statesman in comparison with judges who thus write with and frustrate the aroused moral sentiment of the people, for that sentiment is politically the vital breath of both state and nation."

Judges Servants of People. "Justice between man and man, between the state and its citizens, is a living thing, whereas legislative justice is a dead thing. Moreover, never forget that the judge is just as much the servant of the people as any other official."

Referring to the decisions of the majority of the judges of the U. S. supreme court, holding some recent legislation, including the federal Workmen's Compensation Act, to be ultra vires, the speaker said: "Our judges who have rendered these decisions have been entirely well meaning men, who, however, did not know life as they knew law, and who championed some wrong without political philosophy which they assumed to impose on the people. Their associations and surroundings were such that they had no conception of the cruelty and wrong their decisions caused and perpetuated. Their prime concern was with the empty ceremonial of perfunctory legalism, and not with the living spirit of justice."

A Free Legislature. Col. Roosevelt cautioned the convention against putting shackles on the legislature. The legislature, he said, should have free hand, otherwise all attempts at social betterment would probably be thwarted by judicial construction. He favored reducing the number of officers to be elected; few officers charged with great responsibilities could be kept under public inspection and their power for evil could be cut off at any time by the recall. He favored the initiative and the referendum, but thought they should be used sparingly.

The address was conservative in tone so far as dealing with the big combinations was concerned. He did not believe that we could restore business conditions to what they were 100 years ago; any more than we could arm soldiers with flintlock muskets or build up an efficient navy with wooden ships. The combinations should not be barred because they were big; but they should be prevented from growing big by unlawful means. He saw no reason why the prices of their products should not be as subject to government regulations as are railway rates. He said: "In the past we have paid attention only to the accumulation of prosperity; henceforth we must pay equal attention to the proper distribution of prosperity. The only prosperity worth having is that which affects the mass of the people."

Linked With Immortal Abe. Quite frequently the ex-president argued that his views were in full accord with the views of Abraham Lincoln, and in this connection said: "I doubt whether any man who has a clear vision, his ingrained sense of justice and his spirit of kindly friendliness to all, forecast our present struggle and saw the way out. What he said should be pondered by the capitalist and workmen alike. He spoke as follows (I condense): 'I hold that while man exists it is his duty to improve, not only his condition, but to assist in ameliorating the condition of mankind. Labor is prior to and independent of capital. Labor is the superior of capital and deserves much the higher consideration. Capital has its rights, which are as worthy of protection as any other rights. It is the duty of every citizen to lead to a war upon property. Property is desirable, is a positive good in the world. Let not him who is houseless pull down the house of another, but let him work diligently and build one for himself, thus by example assuring that his own shall be safe from violence when built.'"

## Health and Beauty Hints

By Mrs. Mac Martyn.

Maudie S.: A "made" complexion never looks real, and if you continue using cosmetics the skin will grow rough and unsightly. Try spruzum lotion and I'm sure you will be delighted with the result. Stir two teaspoonfuls glycerine in one-half pint hot water, then add four ounces spruzum. When cool apply sparingly to face, neck and arms and rub lightly until it dries. The spruzum lotion is soothing and healing, cleanses the skin of all impurities and banishes the oily, sallow look. Use this lotion and you will have a complexion rivaling any made by artificial means.

Mrs. Geo. H.: It is dangerous to disregard the laws of nature, and unless you employ a system-tons you may have a run of sickness. I would suggest making up the following old-time blood-purifier and taking a tablespoonful three times daily: In a half-pint alcohol dissolve one-half cupful of castor oil, add one ounce karende and hot water to make a quart. This tonic will expel impurities from the body, cleanse the tissues and restore lost appetite as well as give you renewed strength and vigor.

M. O.: The only quick and sure way to remove dandruff from the cheek is to apply a delatone paste. Let it remain two or three minutes, then wash off, wash the skin and the hair are gone. Only in rare instances is it necessary to use the second application. Delatone costs a dollar for an original ounce-package, but it is worth it to rid the skin of superfluous hair.

Mrs. O.: Glasses at your age, I presume, are quite necessary. However, if you will get an ounce of croton and dissolve it in a pint of cold water and put two or three drops in each eye every day, you can overcome the soreness and redness. Keep up this simple treatment and before long your eyes will take on a youthful sparkle and brilliancy and you will no longer be troubled with weak eyes.

Hope: Don't wreck your nervous system by dieting, because by taking ordinary narcotics found in all drug stores, you can reduce your weight to where you need and deserves much the higher consideration. Capital has its rights, which are as worthy of protection as any other rights. It is the duty of every citizen to lead to a war upon property. Property is desirable, is a positive good in the world. Let not him who is houseless pull down the house of another, but let him work diligently and build one for himself, thus by example assuring that his own shall be safe from violence when built."

The Secret of Good Coffee. The secret of making good coffee is buying good coffee to start with. Good Coffee in Canada, the way coffee markets are at present, costs 50c a pound but buying Dalton's French Drip Coffee at this price is cheaper than ordinary coffee at 30c or 40c because you get all coffee and no chicory and coffee of the highest grade with the "Coffee chaff" taken out.

2 pounds of Dalton's French Drip Coffee made in the Dalton's French Drip Coffee Pot goes further than 3 pounds of the ordinary kind. The moral is obvious.
