GOLD IN THE NORTHWEST.

Saskatchewan Will Yield Up $5,000,000

EVERY SEASON IN FUTURE

The Black Sand on the Bars Shows No Less Than $54 Per Ton in Gold.

World's Special From Fort Steele Giving the Latest Deals in Mining Properties—The London Mining Journal on the Question of Over-Capitalization—Women as Miners—General Mining Topics.

The Edmonton Bulletin, in a two-column leader, makes the startling prediction that instead of $50,000 as heretofore, the Saskatchewan River will hereafter yield $5,000,000 every season in gold.

Gold has been mined, or perhaps more accurately washed, from the bars of the Saskatchewan for many years. The metal is found in the form of minute scales, so small as to be only noticeable by the naked eye from their sparkle. The dust is always found in conjunction with black sand—evidently magnetic iron—amongst the ordinary sand, gravel and boulders of the river bars, which are found on alternate sides of the river throughout its length for 100 miles above and below Edmonton.

By the use of the primitive "grizzley" and blanket the miners used to save $16 a day from the washings, but the bars have been worked over and over again until $1.50 has of late been an average day's pay.

In view of the small returns secured by the miners, it may be wondered why there should be such a rush for mining claims as there has been during the past few days. The explanation is found in the fact that it has been discovered that by the use of improved appliances much higher values could be saved from the sand. This was proven by an assay secured of the black sand tailings from a grizzley in which an assayer found gold at the rate of $54 to the ton. But this was not all. Those experimenting examined the black sand, which it had always been the effort of the miner to get rid of, and came to the conclusion that the black sand instead of being an enemy of the gold, so to speak, actually contained the gold in such form that it was from time to time set free by natural causes, and that this accounted for the renewal of the gold dust deposited on the bar. In support of this idea an assay procured by Isaac Cowie, president of the Board of Trade, showed $268 to the ton of gold and platinum in the black sand out of which all the free gold had been panned by the ordinary process.

FROM FORT STEELE.

Sales of Several Properties Reported From This New Mining Region.

Fort Steele, B. C., March 17.—(Special.)—Messrs. Grare and Vanosland have sold the Little Chief, Big Chief, Eureka and Geneva to a Victoria syndicate for $8000. These properties are in the North Star group.

Mr. Garret has bonded the Vermont Boy to Victoria capitalists. The claim is one of the Perry Creek Group.

Messrs. Watson and Moffat have sold their claims on Perry Creek to Col. Kingsbeerry of Spokane, Mr. Kaupt has sold the "Contact" to Mr. Porter of Spokane.

Mr. Porter of Spokane has also made several other purchases in the Perry Creek district.

Messrs. Thompson, Sundin, Rosendake and Kaupt have sold the Mammoth and Wassa group to Victorians.

The Lake Shore mineral claim (1-2 share) was put up to auction, but as only $1000 was bid the sale was postponed for 30 days. The mine is on Monga Lake.

CARE ADVISED

In the Capitalization and Management of Canadian Mining Companies.

In The London, Eng., Mining Journal under the caption "Over-capitalization of mining companies," appears the following: Although the gold mining industry has suffered so many tribulations during the past 10 years or so, it is a somewhat remarkable thing that the financial side of mining enterprise should have undergone no appreciable change. The average company promoter is not, as a rule, very partial to reform in his methods of doing business, and so long as he has a robust faith in his lucky star he is not disposed to be guided by any principles of industrial economy. Thus it happens too frequently that a really excellent property is conducted on lines that, if applied to an ordinary business, would speedily land the proprietor into bankruptcy. Other mining properties fail to pay at all, when, with a rigid system of economy, they might be made to return very satisfactory dividends to the shareholders. In fact, it would not exaggerate the present state of things to remark that there are very few mines in any part of the world that are giving all that they might be capable of returning to the investors, and there is no doubt that if directors as a class really knew their business, and were sincerely anxious for the welfare of the shareholders, the position of mining would be vastly more satisfactory than it is at the present moment. We do not, however, desire to condemn the directors as a body, because this would be doing an injustice to their commercial morality. What we do most strongly protest against is the system by which gentlemen who are often entirely ignorant of mining matters are appointed on the directorate, and who, safely entrenching themselves behind their own ignorance, leave the whole of the management in the hands of one man or, at the most, of two or three. This concentration of power into one or two hands is most certainly a danger to the interests of the main body of shareholders, as in enterprises of this description those people who confide their money to the company generally do so on the strength of the guarantee of honesty and straightforward dealing that seems to be afforded by the presence of well-known names on the board. If these gentlemen merely draw their stipend, and leave the management in the hands of a professional financier, the object of the plurality of directors as a guarantee that the interests of the shareholders will be well served is entirely defeated. The only remedy for this grievance is that the directorate should be composed exclusively of gentlemen having a practical or technical knowledge of mining management, and it would pay the shareholders to be so represented even at the expense of much heavier stipends.

An adjustment of capital to a moderate estimate of the value of a mining property is of vast importance

Continued on Page 9.

Why not invest in a sure thing? A mine like the Ibex of Slocan—a shipper, with smelter returns $85.50 per ton; net profit per ton over $40.00. Low capitalization, $300,000. Four claims. Lots of timber. Good water-power. Only one-sixth of the shares on the market. Promoters' shares pooled and placed with Bank of B.C. To be held in trust until thirty days after treasury shares have been taken up and until thirty days after a dividend has been declared. On the 1st April the shares will be advanced 20 per cent., making the price $30 per 100 shares.

FAIRVIEW CAMP.

A Great Many Properties are Showing Up Well in This Promising District—What Work Has Been Done.

Vancouver, B. C., March 17.—(Special.)—Stocks have been much more active for the past week in the local market, the Slocan properties being as usual the favorites. There is a more active demand for Bondholder, a proposition owned in Vancouver, owing to the excellent reports received from prominent men who have visited the property. On account of the declaration of a 2½ per cent. dividend, 22½ and 23 is being asked for Two Friends. Trail Creek stocks continue neglected in this market.

Orphan Boy is still selling at five cents, in spite of the creditable reports of the magnificent ore being taken out, the last assay of rock running over $1000.

The Athabasca at Nelson is very stiff at 24 cents, being considered one of the best properties in the province by local investors. The tunnel is now in about 175 feet through a solid mass of the same rich ore, still running over $100, and in many cases nearly $300. At a short distance further on it is expected that another cross vein will be struck, making the second in 200 feet.

The talk of the week, however, is the Fairview Camp, which many believe the most promising camp in British Columbia. Messrs. Dier, Davidson and Russell of Victoria, who own 40 properties in the camp, have secured a town site of some 320 acres, which has been surveyed into lots and registered as Fairview. It is within convenient distance of the camp, and a handsome hotel is being erected.

The chief mines in the camp are as follows: The Smuggler, shaft 110 feet, in good ore and assays well; the Stemwinder has three ledges and ore assays well; the Morning Star is undoubtedly a mine, some $54,000 worth of bullion having been taken out of the property by the company; the Reco has a large open cut and a shaft down some 30 feet, the ledge is about two feet wide and assays run from $40 to $200 in free gold to the ton; the Gold Hill has a large open cut in 50 feet, all in ore, the vein has been stripped for some distance on the surface and shows up 20 feet wide, assays run from $20 to $120; the Shamrock has an open cut and a shaft down about 15 feet; this is a rich property, the ore can be broken up and panned and a good string of gold obtained; the ledge is over two feet wide. The Silver Bow has one tunnel in about 100 feet, one shaft about 45 feet and one 25 feet; the assays run from $50 to $65.

The Comstock has a shaft down over 90 feet, and a tunnel in 50 feet; a large quantity of free gold samples were struck, said to be the finest taken out of the camp; the vein is four feet in ore. The Mammoth has one tunnel 50 feet; there are three ledges on the property running parallel, and there is a tunnel being run in to cross-cut the three ledges; the assays on this property run $40. The Ocean Wave has a shaft down 52 feet; the ledge is four feet wide and well mineralized; the ore is ribbon quartz. The Iron Clad has about $300 worth of work done on it; it is a large ledge and shows up well; the free gold in this rock can be seen with the naked eye. The Finance has one shaft down about 25 feet and a tunnel in about 35 feet; the ledge is about five feet wide and assays well from the grass roots. The Elmore has a shaft down about 40 feet and the ledge is about seven feet and assays $20. The Randolph has a tunnel in about 28 feet and a shaft about 30 feet. The ledge is about two feet wide and is well mineralized. The Highland Chief has considerable work done upon it and assays fairly well in free gold; it has a large ledge and will pay to mill. The California has a tunnel in 45 feet; the lead is about four feet and assays $15. The Quartz Queen has a shaft down some 45 feet and the ledge is three feet on the surface; the assays average $200 in free gold. The surface assay on the White Swan is $17; a shaft is being run in on this property 100 feet. The vein is large and strong free gold being seen in the quartz with the naked eye.

The Tinhorn averages, out of 38 assays, $112.20. There has been 300 feet of work done on this property, besides 1500 feet of stoping. The last two assays, not counted in the averages, ran $1000 and $1900. Twelve men are working on this mine night and day, and a mill has been purchased for the property in Victoria, which it is said, will crush 500 tons per diem.

The Winchester has two shafts, one down 45 feet and one down 15 feet. This property has $3000 worth of ore on the dump, and there is $50,000 worth of ore in sight; the ore averages from $6 to $500; the ledge is four feet wide. This is a chronicle of the actual work done on these properties, and in view of the gloomy report of this camp sent east by a Trail District correspondent, it would indicate that the camp had not had fair play. Fairview Camp is very highly thought of in Vancouver.

The Messrs. Levi of Hamilton and many other Toronto and Hamilton capitalists are largely interested in Fairview.

AT THE SESSIONS.

Lawyer Rowan Got the Verdict—The Alleged Theft of a Bicycle—Not Guilty But Reprimanded.

In the case of Architect Aylesworth v. Rowan, the jury yesterday brought in a verdict in favor of the defendant. The architect sued Mr. Rowan for the cost of preparing plans of a $13,000 house, which was never erected, and defendant claimed the plans were never ordered.

It took the jury 20 minutes yesterday to return a verdict of "not guilty" against Arnold A. McKinnon and Alfred Washington, charged with the theft of a bicycle last September, but asked that they be reprimanded for their foolishness. His Honor accommodated the jury, and severely lectured defendants for about 15 minutes. They were then discharged.

William H. Holmes was up for trial yesterday before Judge McDougall, charged with indecent assault on his domestic, a girl of 17 years. The girl's evidence went to show no "assault" had been committed, and the judge did not allow the case to go to the jury.

In discharging the prisoner, Judge McDougall said that the law of consent should be extended from 16 to 18 years of age.

Only those who have had experience can tell the torture corns cause. Pain with your boots on, pain with them off—pain night and day; but relief is sure to those who use Holloway's Corn Cure. ed

THE INSTITUTE
—OF—
CHARTERED ACCOUNTANTS OF ONTARIO.

The Spring Examinations of the Institute will take place on Wednesday, Thursday and Friday, the 19th, 20th and 21st of May next, commencing at 10 o'clock a.m. each day. The Intermediate Examinations may be taken at Toronto, Belleville, Owen Sound or Kingston. The Final Examination may be taken at Toronto only.

Applications will be received by the Secretary not later than the 30th April next, and must be in the form prescribed by the bylaws of the Institute. Full information on application to

ESTATE NOTICES.

NOTICE TO CREDITORS—In the matter of Charles Pye Parkinson, insolvent, Stationer.

Notice is hereby given that the above-named insolvent has made an assignment under R.S.O., 1887, c. 124, and amending acts, of all his estate, credits and effects, to me, for the general benefit of his creditors.

A meeting of his creditors will be held at my office, 10½ Adelaide-street east, Toronto, on Tuesday, the 23rd day of March, 1897, at the hour of 3 o'clock in the afternoon, to receive a statement of affairs, to appoint inspectors and fix their remuneration, and for the ordering of the affairs of the estate generally.

Creditors are requested to file their claims with us, with the proofs and particulars thereof, required by said acts, on or before the day of such meeting.

And notice is further given that after the 1st day of May, 1897, I will proceed to distribute the assets of the debtor amongst parties entitled thereto, having regard only to the claims of which notice shall then have been given, and that I will not be liable for the assets, or any part thereof, so distributed to any person or persons of whose claim I shall not then have had notice.

Dated this 16th day of March, 1897.

JAMES B. BOUSTEAD,
Assignee,
10½ Adelaide-street east, Toronto.

IN the Matter of Esther Ware Moore of the City of Toronto, in the County of York, Widow, an insolvent.

Notice is hereby given that Esther Ware Moore of the City of Toronto, in the County of York, has made an assignment under R. S. O., 1897, c. 124, and amending acts, of all her estate, credits and effects to Florence Moore, of the said City of Toronto, spinster, for the general benefit of her creditors.

A meeting of her creditors will be held at the office of Messrs. Corley & Loftus, 78 Canada Life Building, 40-46 King-street west, in the said City of Toronto, on Wednesday, the 24th day of March, at the hour of 3 o'clock in the afternoon, to receive a statement of affairs, to appoint inspectors and fix their remuneration, and for the ordering of the affairs of the estate generally. Creditors are requested to file their claims with the above-named solicitors, with the proofs and particulars thereof required by the said acts, on or before the day of such meeting, and notice is further given that after the first day of May, A. D. 1897, the assignee will proceed to distribute the assets of the said debtor amongst the parties entitled thereto, having regard only to the claims of which notice shall have been given, and that she will not be liable for the estate, or any part thereof, so distributed to any person or persons of whose claim she shall not then have had notice.

Dated this 17th day of March, A. D. 1897.

AUCTION SALES.

AUCTION SALE of Valuable Farm Property in the Township of York.

The following property will be offered for sale by public auction on Thursday, March 25, 1897, at 2 o'clock p.m., by Henry Russell, Auctioneer, at the Golden Lion Hotel, Lansing, under the powers of sale contained in certain mortgages, which will then be produced:

Parts of Lot No. 23, in the 1st concession, and of Lot No. 23, in the 2nd concession, east of Yonge-street, in the Township of York, in the County of York, containing 157 acres, more or less, now or lately in the occupation of Samuel Hughes, and more particularly described in a certain mortgage dated the 1st day of November, 1852, and registered in the Registry Office for the said County of York as No. 41412, in Book Y3, for the Township of York, which mortgage will be produced at time of sale.

The above valuable farm property is situated near the corner of the Mill-rd., and 2nd concession, East York Township, about one and a quarter miles east of Newtonbrook, and is conveniently situated to the Metropolitan Railway. It is well watered, and there is a good orchard, with young pear trees, and bearing apple trees, on the premises, also a grove of young walnut trees. There are said to be erected on the premises a one and a half storey frame dwelling, also a good barn, with stone cellar for stabling.

Terms: Ten per cent. cash at the time of sale. Liberal terms for payment of balance will be made known at time of sale.

For further particulars and conditions of sale apply to the Auctioneer, 315 Yonge-street, Toronto, or to ROBINSON, O'BRIEN & GIBSON, Vendors' Solicitors, 74 Church-street, Toronto. 443

Morning Glory Mines
NEAR VERNON, B.C.

Few, if any, mining properties have so many important points in their favor as the Morning Glory mines.

1. We have a group of four claims loaded with Free Milling Ore.
2. Our assays run up to $100 per ton, and a sample with no mineral visible to the eye showed $21 of gold per ton.
3. We have three claims in line with the several fine ledges, which give us 4500 feet of a run.
4. Our shaft is down 85 feet on a 7 foot vein and 400 tons of ore on the dump.
5. With the prospect of a stamp mill immediately to hand and such an immense quantity of rich ore in sight, the question of large dividends is assured. Orders for shares at 15c should be received before April 1.
