**RATIONAL SOCIAL SYSTEM.**

Discussion on the Scientific Requirements for the True Ideal of Society.

Rev. S. S. Craig addressed the Social Reform League in Guild Hall last night on "Scientific Requirements of a Rational Social System."

He contended that before the physical could be solved we must solve the metaphysical. While we are all more or less biased in our opinions, social reformers must overcome this and get together, as there are enough in Canada to make the existing Governments tremble.

The great fundamental principle must be discovered, and the great problem of life is to discover the relation of cause to effect. Various reformers, free advocates, anarchists, single taxers, socialists and preachers proposed cure-alls for the evils of the present economic condition, but in doing so they fail to distinguish between sequence and consequence.

Collectivism and individualism are both needed in a true state of society. The speaker also criticized socialists for condemning competition.

All public utilities should be in the hands of the Government, but private property should not be abolished.

Messrs. Phillips Thompson, Wright, Jones, Park, Hunter, Levesque, Martin and W. H. Maroon of Parry Sound also spoke, and the general opinion was that competition in giving rather than getting was the true ideal.

You do not need to accept our bare statement of what these pianos are, but when artists like Dan Godfrey, Plunket Greene, Ben Davies, Madame Albani, Scalchi, Burneister and many others tell you that these pianos will bear comparison with the best pianos made anywhere in the world you will have confidence that you are getting a high-class piano. An instrument like these is not to be compared with the ordinary instrument made for general selling.

"I have sung to your piano on my two Canadian tours, and at the close of my second season in Canada, I feel I would be lacking in courtesy did I not congratulate you on the high character of the instrument which you produce. My recital programme involved a wide selection of songs of most varied characteristics and required of necessity a piano capable in the highest degree of the most delicate inflections and the widest range, alternating from fine pianissimo effects to the most powerful manifestations of dramatic force. To those demands I found your instrument most responsive. I can assure you that it was to me as an Englishman the heartiest pleasure to find so splendid a piano assisting in the musical prestige of Her Majesty's foremost colony."—PLUNKET GREENE.

I can assure you that it was to me as an Englishman the heartiest pleasure to find so splendid a piano assisting in the musical prestige of Her Majesty's foremost colony."—PLUNKET GREENE.
