Spread of Hog Cholera - The Parasite Theory Discredited.

Windsor, Ont., Nov. 7 .- A number of the veterinary surgeons in Essex and Kent counties have issued a statement that the so-called hog cholera which is causing such ravages at present is nothing but a lung disease, caused by a long white parasite preying on the tissue of the lungs; but the Government staff of veterinary surgeons at Windsor have made a scientific investigation, and are convinced that it is genuine hog cholera.

In spite of all they have been able to do, the disease is spreading at an alarming rate, and now the Walker farm, at Walkerville, and the Robinson and Hurst farms, at Sandwich South, are quarantined. On the Walker farm 60 hogs were slaughtered Thursday, and the rest are to be killed. Thirteen hogs-all that Hurst ownedwere slaughtered Thursday.
Dr. McEachren, the Dominion Government chief inspector, is on the spot

aiding the local officers to stamp out the plague. The most stringent precautions are being taken in view of the terribly contagious nature of the disease. The carcases of the animals killed have to be burned, and the ashes buried in lime or earth eight feet deep and covered with four inches of lime.
