

STRIKE OR NO STRIKE

**Never In History Was Time
So Valuable As It Is Today!**

There aren't minutes enough in the hours
nor hours in the days for one to accom-
plish what one sets out to do.

Then why waste all this valuable time
bickering and bantering with the street
railway corporations?

NEWSPAPERS in London have devoted page after page to the settlement of the street railway squabbles with no results. You—your neighbors—are not interested one iota in what the street railways do. What you want is transportation to and from your place of business, and we stand ready to supply you with THAT transportation at a far less cost to you than the service which street railway supplies you.

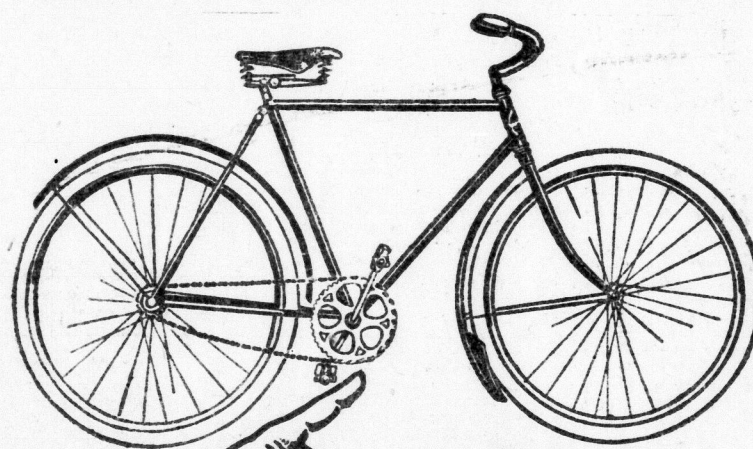

Red Bird Bicycles Are Today Furnishing Transportation for Tens of Thousands!
