

EXPERIMENTAL DEPARTMENT :

PAGE.
57

Field experiments, 58—Live stock experiments, 58—Co-operative experiments, 58—
Rainfall and temperature, 59—List of experiments, 59—Field plot experiments, 61
—Cereals, on small plots, 61—Barley, comparative test of varieties, 61—Barley,
different dates of seeding, 65—Peas, comparative tests of varieties, 66—Spring
wheat, comparative test of varieties, 66—Spring wheat, different dates of seeding,
69—Ontario varieties of winter wheat, 70—Winter wheat, comparative test of
foreign varieties, 76—Oats, comparative tests of varieties, 78—Oats, different dates
of seeding, 82—Barley, spring wheat and oats, sown separately and in mixtures, 83
—Cereals on large plots, 83—Barley, 83—Peas, 84—Spring wheat, 85—Oats, 85—
Potatoes and roots, 86—Potatoes, comparative test of varieties, 86—Potatoes, differ-
ent depths of planting tubers, 87—Swede turnips, comparative test of varieties, 88
—Swede turnips, thinning plants to different distances in the drill, 89—Fall tur-
nips, comparative test of varieties, 90—Mangels, comparative test of varieties, 91
—Carrots, comparative test of fifteen varieties, 92—Sugar beets, comparative test
of varieties, 92—Comparative yield of roots upon flat and ridged land, 92—Swede
turnips, mangels and sugar beets grown at different distances between the drills,
93—Large plots with sugar beets, Swede turnips, mangels and carrots, 93—Silo
and forage crops, 94—Fodder corn, comparative test of varieties on sod and on
stubble land, 94—Influence of salt with fodder corn on four kinds of soil, 98—
Fodder corn, hills *versus* drills, 99—Rape, application of fertilisers, 100—Rape,
thinning plants to different distances in the drills, 101—The growth and uses of
rape, 101—Illustration : Lambs feeding upon rape, 103—Experiments in growing
millet, millo maize, and Kaffir corn, 105—Clover, comparative tests of varieties,
106—Experiment in growing white or table mustard, 106—Grain exhibit, 106—
Live stock experiments, 106—Corn ensilage for making beef, 106—Feeding shorn
and unshorn lambs in winter, 110—Fattening lambs for the British market, 113—
Ensilage and roots as food factors in swine feeding, 118—Feeding swine with grain
and meal, 122—Feeding grade steers of different breeds, 125—A feeding test be-
tween the improved Yorkshire and Berkshire breeds of swine, 131—An experiment
to determine the amount of manure made by a cattle beast during the successful
period of its growth, 131—An experiment to determine the effects of constant
confinement upon breeding properties of a cattle beast, 131—The feeding of lambs
upon rape alone, rape and meal, and rape and pasture, 131—The feeding of lambs
upon rape alone, when all the conditions are favorable, 132—Feeding lambs upon
rape grown after winter wheat, 133—The exhibit of live stock, 133.

REPORT OF THE FARM FOREMAN :

Cropping, 134—Live stock, 139.

134

REPORT OF THE MECHANICAL FOREMAN :

140

PART VIII.

REPORT OF THE PROFESSOR OF DAIRYING :

143

Farmers' Institutes, 143—Travelling Dairy, 144—Illustrations : Butter moulds, 147—
Illustration : Shipping box, 148—Dairy work at the College, 152—Illustration :
Hand cream separator, 153—The effect of food on the quality and quantity of milk,
154—Effect of food on quantity of milk, 160—Source of butter fat in milk, 163—
Record of our dairy herd, 173—Differences in creaming, due to peculiarities in the
individual cows of our herd, 175—Experiments with Boyd's Vat and Starter, 178
—Illustration, 178—Sweet cream butter, 179—The setting of milk delayed, 181—
Babcock and Beimling tests, 183—Composite samples, 184—Per cent. of fat in
whole milk, skim milk and butter-milk, 185—Variations in fat of samples of milk
taken at different periods during milking, 185—An incident in buying a cow, 186
—Amount of land required to soil cows, 186.

AGRICULTURAL AND EXPERIMENTAL UNION.

TWELFTH ANNUAL MEETING :

President's address, T. G. RAYNOR, B.S.A.	187
The future of the live stock industry of Ontario, THOS. SHAW	188
