EXODUS OF AMERICANS

Nearly 100,000 Have Bought Canadian Farms This Year.
Nearly 100,000 American farmers have purchased approximately 8,000,000 acres of land in Western Canada, since the beginning of the year, according to a Winnipeg dispatch to The Calgary Daily Herald, which goes on to say that thousands more are expected during the harvest season to inspect the famous wheat belt and purchase land on which to settle next year.
This information was given out by L. A. Walsh, head of a big American company, organized some time ago to handle farm lands, who declared that of the outstanding features of this great influx of new settlers has been the trend toward British Columbia. There has also been a large emigration from Winnipeg. Most of the American farmers who purchased land this year will not settle on it until next spring or later, the move from their present homes depending upon circumstances.
Reports obtained from the Dominion Immigration Department in Winnipeg show that only about 16,000 Americans who came into Western Canada made definite declaration that they were taking up residence in the country this year. More than \$2,500,000 in actual cash was brought into Western Canada by these settlers while their effects are valued at more than \$1,700,000, according to statistics furnished by the immigration department. During March 38 cars containing settlers' effects arrived.
Nearly 2,000 of the new comers settled in Manitoba, the remainder taking up farms in Saskatchewan, Alberta, British Columbia and Western Ontario.

WHEAT, CORN AND OATS

Chicago, Aug. 19.—There was a lack of pressure at the start of the wheat market today, which caused initial prices to be firm. First quotations were unchanged to quarter cent higher with December \$2.29 to \$2.30 1/2, and March \$2.41.

HOUSEHOLD CONNECTIONS

With eastern connections were in the market early but when corn started downward there was free selling by local traders causing prices to make a sharp dip, which caused commission houses to buy on resting orders. They soon absorbed the surplus in the market, and a rally set in and framed the market.

Corn was under pressure at the start and September led the futures in the slump, the range being 1-8 cent to 1-4 cent lower with September \$1.44 to \$1.44 1/2-2 and December \$1.22 to \$1.22 1/2-2.

Oats were off with corn, first quotations being down 1-8 cent to 3-8 cent, with September 67-84 and December 68 to 68 1/2.

Provisions were weaker and lower with hogs and grains.
