If You Want A Good Boarding Place Use A "Range-Finder"

Young men who served with the artillery know what a range-finder is. In fact, everyone who followed the war news has a pretty fair idea of its use. The range-finder is a telescopic instrument for determining the distance of an object from the instrument.

How can you use a "range-finder" to find a good boarding place? Simply insert an advertisement in the want ad columns of The Times-Star. The Times-Star goes into nearly all of the worth while homes of the city. Many people will read your advertisement this evening and address answering letters to your box number in The Times-Star office.

During the next day or two, you would call at the office for your answers and from them select the most attractive places for investiga-

You might tramp the streets of St. John for weeks and months without locating the right kind of boarding house. With your want ad as your "range-finder" you quickly locate exactly the sort of accommodations you desire.

In other words, instead of directing your search toward every point of the compass, the want ad almost instantly directs your footsteps to the very home you wish to locate in.

Times-Star want ads are efficient "range-finders" for most every sort of proposition. Read them for profit—use them for results. You get replies from the right kind of people.
