Truro, Jan. 15.—The temperance feeling in regard to the coming election is rising higher each day. Last night the ministers brought before the people in the prayer meetings the anti-liquor question. At the last session of parliament S. E. Gourley, M. P., spoke most decidedly about the downfall of the United States, and even signified his willingness and readiness to assist in bringing this about. Mr. Gourley has still further assumed the role of prophet and in a recent interview with the Telegraph's reporter asserted that the downfall of the United States was inevitable and will come in the nature of things. He declares that anyone who has made a careful study of the history of the United States must see that his predictions will come true. In the strength of this idea Mr. Gourley is about to commence a series of lectures on The Decline and Fall of the United States. He is to begin the series on Thursday night at the Mutual Improvement Society of that place.

On the other hand, however, Mr. Gourley, while professing to hold these views, has expressed to somewhat opposite sentiments yesterday at a meeting of the municipal council of Colchester. He emphatically declared that the people of Canada were the best governed in the world, and on the face of the earth; that they enjoyed in idleness when any improvement of the country was talked of or else they directly opposed the measure, and that, on the other hand, the people of the United States took hold and helped themselves and were thus going ahead.

The first one, which will be similar to the present one, will be erected at once and the second will be erected at a later date. The International pier will be commenced next summer, and will be used as a coal shipping pier. The present shipping facilities at Sydney are inadequate for the growing demands of the steel and coal companies. At time vessels are compelled to lay in the stream for hours before they can get a berth. The new piers when completed will give employment to about 150 hands.

The last cargo of coal this season for Europe will leave here on Thursday on the steamship Drottning Sophia. The vessel will take about 7,000 tons, which will be shipped in the next few days. Washington, Jan. 14.—While a large crowd was meeting on the bathing basin near the Washington monument this evening the ice suddenly gave way and precipitated 20 or more persons in the water. At least three persons are known to have been killed.

Those dead are Jessie C. Thomas, 20, a clerk in the bureau of ethnology; Arthur Wasserback, an employee of the bureau of engineering; and a young man named Hamill, a clerk in the war department.

Wasserback was a native of Washington, Hamill is from Michigan, and Miss Thomas previous to a year ago had lived in Fredrick, Md. Hamill was about 45 years of age.

There were probably 2,000 persons skating on the basin at the time of the accident. A hot water pipe from the engine room of the Washington monument burst and the water ran down the basin where the ice gave way.

The skaters had been warned that the ice was dangerous one but it is said they disregarded the advice given them to stay away from the vicinity.

When the crash came fully 30 men and women went through the broken ice and into the water. All were rescued except the two men whose bodies subsequently were recovered. Miss Thomas died a short while after her removal to the hospital.

I Will Cure You of Rheumatism, Else No Money is Wanted.

"Any honest person who suffers from Rheumatism is welcome to this offer. I am a specialist in Rheumatism, and have treated more cases than any other physician. I think for 10 years I made 2,000 experiments with different drugs, testing all known remedies while searching the world for something better. Nine years ago I found a costly chemical in Germany which, with my previous discovery, gives me a certain cure.

I don't mean that it can turn bony joints into flesh again; but it can cure the disease at any stage, completely and forever. I have done it fully 10,000 times. I know it so well that I will furnish my remedy on trial. Simply write to me a postal for me book on Rheumatism, and I will mail you the order your doctor has given you. I will send you my book 'Rheumatism Cured' and it is only \$5.00. If it fails I will pay you \$5.00. If it succeeds I will pay you \$5.00. I mean that simply. If you can't get the remedy, I will send you \$5.00. I don't expect a penny from you. Any one sample that has effect on Rheumatism must be sent to the doctor. I use no such drugs, and it is only a matter of time before the disease is cured. You must get the disease out of the blood. My remedy is the only one in the world that cures, obviates cause. I have cured the oldest cases that I ever met. And in all my experience—in all my 2,000 tests—I never found another remedy that would cure a chronic case in such a short time.

Write me and I will send you the order. Try my remedy for a month, as it can't harm you anyway. If it fails it is free. Address Dr. Shoop, Box 11, Racine, Wis.

THE OLDEST MAN IN AMERICA

Tells How He Escaped the Terrors of Many Winters by Using Pe-ru-na.

MR. ISAAC BROCK, BORN IN BUNCOMBE CO., N. C., MARCH 1, 1788. His age is 114 years, vouches for by authentic record. He says: "I attribute my extreme old age to the use of Pe-ru-na."

A short time ago, at request, Uncle Isaac came to Waco and sat for his picture. In his hand he held a stick cut from the grave of General Andrew Jackson, which has been carried by him ever since. Mr. Brock is a dignified old gentleman, showing few signs of decrepitude. His family Bible is still preserved, and it shows that the date of his birth was written 114 years ago.

Surely a few words from this remarkable old gentleman, who has had 114 years of experience to draw from, would be interesting as well as profitable. A lengthy biographical sketch is given of this remarkable old man in the Waco Times-Herald, December 4, 1898. A still more pretentious biography of this, the oldest living man, illustrated with a double column portrait, was given the readers of the Dallas Morning News, dated December 11, 1898, and also the Chicago-Times Herald of same date.

LIKELY TO EXEMPT LONDONDERRY WORKS, BUT ARE DIVIDED AS TO TIME.

Truro, N. S., Jan. 14.—(Special)—The Londonderry Iron & Mining Company, which lately acquired the property formerly owned by the Londonderry Iron Company at Londonderry, applied to the municipal council in session here this afternoon for exemption from taxes, county poor and statute labor, on property, iron works and carriage works, and gave notice they would apply to the local legislature next session for an exemption act.

The matter created a warm discussion, occupying the whole afternoon, and it was carried over till tomorrow morning.

All the council favor some concessions, but vary in the matter of exemption from five to 20 years.

S. E. Gourley, M. P., urged giving the company all that was asked. F. A. Laurence, M. P., will speak tomorrow morning.

The property is now paying \$400 a year in taxes. They will not ask exemption from school taxes, which were formerly \$700 yearly.

In presenting the petition, the company, under the signature of the business manager, J. P. Plimpton Edwards, made a statement that the property consisted of 29,000 acres; they are reconstructing and remodeling buildings and machinery, erecting new buildings of permanent nature; that no necessary expense to make the plant up to date will be spared; that

SPORTING EVENTS OF A DAY.

Hockey.

St. Stephen, N. B., Jan. 15.—The curling rink was crowded tonight to see the Marvyns and Thistle hockey team in what proved to be an interesting game. The visitors scored a goal in the first few minutes, and were generally applauded. Then the Thistles got to work and before the first half had ended scored four goals, and one that was not allowed. In the second half they scored three goals and one that was not allowed, the game ended seven to one in favor of St. Stephen. Marvyns seemed to be particularly weak in its goalkeeping. Inch and Kue did good work for the visitors but Robinson, after one or two warnings, was ordered off the ice for five minutes in the second half. Munger, McGarrigan and McWha did well for their team, those stationed near the goal having an easy time. The visiting team made a good impression though they played a little roughly.

CURLING.

This centenarian is an ardent friend of Peruna, having used it many years. In speaking of his good health and extreme old age, Mr. Brock says: "After a man has lived in the world as long as I have, he ought to have found out a great many things by experience. I think I have done so."

"One of the things I have found out to my entire satisfaction is that proper thing for ailments that are due directly to the effects of the climate. For 114 years I have withstood the changeable climate of the United States."

"I have always been a very healthy man, but of course subject to the little ailments which are due to sudden changes in the climate and temperature. During my long life I have known a great many remedies for coughs, colds and diarrhoea."

"As for Dr. Hartman's remedy Peruna, I have found it to be the best, if not the only, reliable remedy for these ailments. It has been my standby for many years, and I attribute my good health and extreme old age to this remedy."

"It exactly meets all my requirements. It protects me from the evil effects of sudden changes; it keeps me in good appetite; it gives me strength; it keeps my blood in good circulation. I have come to rely upon it almost entirely for the many little things for which I need medicine."

"When epidemics of the grippe first began to make their appearance in this country I was a sufferer from this disease."

"I had several long sleazes with the grip. At first I did not know that Peruna was a remedy for this disease. When I heard that la grippe was epidemic catarrh, I tried Peruna for la grippe, and found it to be just the thing."

Yours truly,

Isaac Brock.

FOOT AND MOUTH DISEASE.

Secretary of Agriculture Board, London Cables Maine for Text of Prohibitive Order.

Augusta, Me., Jan. 14.—Governor Hill yesterday received cable message from the secretary of the board of agriculture, London (Eng.), asking for the text of the order prohibiting the importation into Maine of cattle infected with the foot and mouth disease. The following answer was sent by Governor Hill:—

"Copy commissionaire sent today. It closes all railways, roads and bridges against traffic in cattle, sheep and swine, from infected states."

ONLY A SUGGESTION.

But It Has Proven of Interest and Value to Those Who Use It.

Common sense would suggest that if one wishes to become fleshy and plump it can only result from the food we eat and digest and that food should be abundant and flesh forming food—beefsteak and cereals; in other words the kinds of food that make flesh are the foods which form the greater part of our daily bills of fare.

But the trouble is that while we eat enough and generally too much, the stomach, from abuse and overwork, does not properly digest and assimilate it, which is the reason why many people remain thin and under weight; the digestive organs do not completely digest the flesh forming food—beefsteak and cereals—and similar food.

There are thousands of such who are really consumed by dyspepsia, although they may have no regular medicine or treatment from their stomachs. Such persons would lay their troubles aside and make regular practice of taking one or two tablets each meal of Stuart's Dyspepsia Tablets. The food would be quickly and thoroughly digested, because the tablets contain the natural peptones and diastase which every weak stomach lacks, and by supplying this want the stomach is soon enabled to regain its natural power.

Stuart's Dyspepsia Tablets digest every form of flesh-forming food, meat, eggs, bread and potatoes, and are the reason they so quickly build up strength and invigorate thin, dyspeptic men, women and children.

Invalids and children, even the most delicate, use them with marked benefit; they contain no strong, irritating drugs, no cathartics, nor any harmful ingredient. Stuart's Dyspepsia Tablets is the most successful and most widely known of any remedy for stomach troubles because it is the most reasonable and scientific of modern medicines.

Stuart's Dyspepsia Tablets are sold by every druggist in the United States and Canada as well as in Great Britain, at 50 cents for complete restorative course. Nothing further is required to cure any stomach trouble or to make thin, nervous, dyspeptic people, strong, plump and well.

The bay of Naples, between the city of that name and the famous island of Capri, has a bed which furnishes about 2,500,000 worth of coral every year. The fishermen use old nets, untwisted rope ends, and other things of that sort, which are dragged across the bottom of the sea. The coral branches become entangled in them, break off, and are pulled up.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Creosote tablets, ten cents per box. All druggists.
