IN preparing the specifications for your new home or the remodelling of your present one, don't neglect to make proper provision for an adequate supply of pure, healthful warmth during the cold weather. Remember, in planning your home, you live indoors the greater part of the time, and the rigorous climate of Canada demands artificial heat six to eight months of the year. Instruct your architect or builder to specify

King Boilers and Radiators

and you will solve for all time the problem of an efficient, cleanly, economical and healthy heat supply.

The King Boiler extracts the greatest amount of heat from the fuel burned. It distributes evenly, clean, healthful warmth to all parts of the house, leaving no cold rooms, chilly corners, or draughty hallways.

The heat is always under your absolute control, and is so easily regulated that the house may be kept at the same temperature, no matter how the weather changes outside.
