MONKLAND YORKSHIRES

are the easily-fed, quick-maturing kind. The sort the farmers want. All ages for sale. 100 sows bred now.

JAMES WILSON & SONS,

FERGUS, ONTARIO

Summer Hill Herd of Large English Yorkshires

We are bound to get rid of 100 Yorkshires, either sex, any age, within the next few weeks. Since the United States ports are closed against us, our trade has been more than cut in half, and we must

sell double the number to Canadians to make room for natural increase in the herd. If you think of buying a large, growthy Yorkshire in the near future, do it now and save your money. We have the greatest show record on earth. Also the world's public sale record. Better write now. We will also sell a few choice Holstein heifers, in calf to the best backed-up bull in Canada.

D. C. FIATT & Son, Millgrove, Ont., Hamilton Sta.

Maplehurst Herd of Tamworth Swine, Bronze Turkeys, Toulouse Geese, Pekin Ducks, S. C. W. Leghorns.

Tamworths of excellent breeding and ideal bacon type. Herd won sweepstakes at Toronto and London, 1905-6-7-8; winnings at World's Fair, St. Louis, 1904—sweepstakes aged and junior herd, and two grand championships. Apply to:
D. DOUGLAS & SONS, MITCHELL, ONTARIO.

SUNNYMOUNT BERKSHIRES

Highest standard of type and quality. For sale: Sows of all ages, and 4 yearling boars. A grand, good lot. Also younger ones. Pairs not akin.

JOHN McLEOD,

C. P. R. & G. T. R. Milton P. O., Ont.

Duroc-Jersey Swine and Leicester sheep. 25 one and two shear ewes, 3 shearing rams, and this year's crop of ram lambs. Also sows in pig, and sows ready to breed; boars fit for service, and pigs ready to wean. **Mac Campbell & Sons, Harwich, Ont.**

NEWCASTLE Tamworths, Shorthorns and Cotswolds.

I can furnish right now a large number of extra choice boars fit for service, some sows in pig, and any quantity about two months old, of such noted sires as imported Cholderton Golden Secret, Colwill's Choice, and Newcastle Warrior—champion boars at Toronto National several years in succession, and out of great big show sows. A few choice heifers; some safe in calf. Bulls ready for service. Will be sold very reasonable for the next 30 days. Also ten ram lambs and two shearing rams. **A. A. Colwill, Newcastle, Ont.**

Maple Leaf Berkshires

For sale: Sows bred and ready to breed. Guelph winners among them. Boars all ages. The highest types of the breed. Imp. sires and dams. Pairs not akin.

Joshua Lawrence, Oxford Centre, Ont.

Morrison Tamworths, Shorthorns and Clydesdales.

Tamworths from Toronto winners. Either sex. Any age. Sows bred and ready to breed. Pairs not akin.

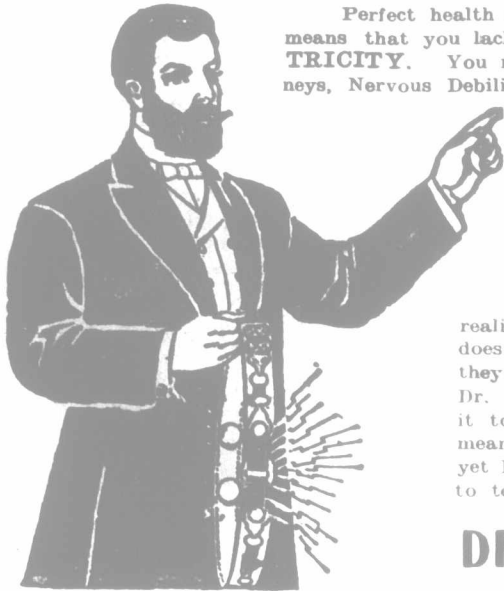

CHAS. CURRIE, Morrison, Ont.

Schaw Sta., C. P. R.

ELMFIELD 50 young pigs for sale, both sexes. Young sows bred to imported boar, also sows to Canadian-bred boar due to farrow about 1st October.

G. B. Muma, Ayer, Ont. C. P. R.; Paris, G. T. R.

Weak Men, Read

Perfect health and strength denote the absence of disease. When you are weak it means that you lack that which is the foundation of strength—of life itself—ELECTRICITY. You may be afflicted with Rheumatism, Dyspepsia, Lamé Back, Weak Kidneys, Nervous Debility, Sciatica, Constipation, or any of the numerous diseases which lead to an early breaking down of the system. If you have any of these troubles they should be attended to at once. You have tried drugs, and found that if they even stimulated you they did not cure, but left you with some new trouble as a result of the poison put into your system.

It is pitiable to think of the vast number of men who go on from day to day suffering mental and physical torture as a result of their weakness, while right at their doors other men are being cured of the same disease. One who has not known it himself cannot realize the feelings of a man in an advanced stage of Nervous Debility, nor does he hear it, for these men do not talk of their troubles. Even when they are fortunately led to use the remedy which is now so well known—Dr. McLaughlin's Electric Belt—and are cured by it, they do not mention it to their closest friends; hence the prevalence of this trouble, and the means of cure is appreciated only by those who have had experience. And yet I have thousands upon thousands of grateful patients who are willing to testify to their cures by

DR. McLAUGHLIN'S ELECTRIC BELT

and who would be glad to share their knowledge with others if written to. I send the names of these men to any one who requests them. There is not another remedy in the world to-day that has proved as effective. Its cures speak volumes for the good work it has accomplished. My confidence in my method enables me to offer to any man or woman who will give me reasonable security the use of the Belt at my risk and

PAY WHEN CURED.

My Belt is also an absolute remedy for Nervous Debility, Backache, Rheumatism, Stomach, Liver, Kidney and Bladder troubles. It is arranged for women as well as men, and cures female weakness.

MR. WALTER F. SHEPPARD, Allandale, Ont., says my Belt did him more good than all the medicine he ever took. He sleeps and eats better, has better circulation, and feels like a different man.

It's as good for women as for men. Worn while you sleep, it causes no trouble. You feel the gentle heat from it constantly, but no sting, no burning, as in old-style belts.

QUESTIONS AND ANSWERS. Miscellaneous.

HORSE WITH SORE EYES.

I have a mare about twelve years old and about every two months a white scum comes on her eyes and stays about a week and then goes away, and they seem all right for about a couple of months. Then it comes back again. Could you tell me, through your paper, what is the cause and what to do for them?
J. J. F.

Ans.—No doubt your mare is ailing with periodic ophthalmia. This is a constitutional disease, and its recurrence cannot be prevented. It is an inherited predisposition. The attacks sooner or later are liable to result in cataract, and perhaps permanent blindness. Treat each attack by placing the mare in a comfortable, partially-darkened stall, feed lightly, and bathe the eyes thoroughly three or four times a day with hot water, putting into the eyes a few drops of the following lotion twice a day: Sulphate of atropia, 10 grains; distilled water, 2 ounces.

RAPE AS PASTURE FOR HOGS.

I would like some information in regard to growing rape for summer pasture for hogs. Is it as good as the same amount of clover pasture? What is the proper time to sow? Can it be sown in May? Should it be sown broadcast or in drills; if the latter, how far apart should the rows be? Should the drills be ridged up or left level? How soon after sowing would it be fit for hogs? What ages should they be before they might safely be turned in to the rape? How many hogs (shoats) would an acre carry all summer, until October 1st or 15th?
R. H. R.

Ans.—On soils that are in fit condition for the growing of this crop, nothing is more satisfactory for hog pasture than rape. In some cases it might be desirable to have clover, because of the benefit of the leguminous crop on the soil. Rape can be sown with fair chances of success any time from spring seeding to well on in summer, though late seeding will not grow as rapidly, unless there is an abundant rainfall. May is perhaps as good as any month in an average season, were it not for the prevalence of the aphids in June. For this reason seeding is delayed in many districts until about the middle of June. An effort should be made to sow just before or immediately after a rain. Some prefer to sow broadcast, but the authorities at the Ontario Agricultural College, and many prominent stockmen, always sow in drills, so that the cultivator can be used between the rows. On rich soils and with early seeding, however, satisfactory returns are assured from sowing broadcast. The drills should not be ridged up unless they are afterwards flattened with a roller, as there is danger of sheep in pasturing on the land getting on their backs. Twenty-five to twenty-eight inches apart suits for cultivation, and the plants soon spread to fill the spaces. The time required before hogs can be turned on to pasture depends on the nature of the soil, the weather conditions and number of hogs that will be running on a given area. As a rule there is a good stand in six weeks, and almost a full crop in eight weeks. Hogs can be turned in at any age, but it is well not to leave them in for a full feed until they have become used to this forage. Care also should be exercised in turning them in during wet weather. The number of shoats that can be carried all summer on an acre will be regulated by the size of the shoats, the stage of maturity of the crop when the animals are first turned in, and the weather conditions that prevail throughout the balance of the season. On the average, perhaps 15 to 18 shoats should be reasonably supplied for at least two months on an acre. In many cases a greater number would find all they wanted for a longer time. It is wise to divide the rape field into two sections, and seed one half a week or two earlier than the other, and pasture the two acres alternately, taking care not to pasture either too bare at any time. Hogs, of course, require some grain along with rape for best results.
