### Suppose This Were YOUR Home!

Carefully consider fire protection when you build or remodel your home.

Every waking and sleeping moment you and your family spend in an inflammable house you risk your lives.

Build for safety by using Gypsum Board and Gypsum Plaster.

Then all your partitions and ceilings will be made of material that can't burn—Gypsum.

Tight joints, no cracks or crevices, air-space insulation between walls (all features of this type of construction), positively prevent the spread of heat and flames.

Added advantages of Gypsum Board and Plaster are their sanitary and sound-proof qualities.

Ask for the Gypsum Board booklet—it's free.

An open fall with no cold weather  
until late in December is predicted  
by Henry Prince, a grandson of the  
great Indian Chief Peguis, who  
bases his opinion principally on the  
position and movement of the stars,  
and declares that the dipper is ex-  
ceptionally slow in its turning move-  
ments this season. We only hope  
the prediction is true.
