

But let no woman despair of relief from this torture. That famous tonic reconstructor of diseased or disordered female organism.

Lydia E. Pinkham's Vegetable Compound

has cured more than one million American women, and it will cure you. When troubled with painful irregularities, when backaches and headaches drive out all ambition, Lydia E. Pinkham's Vegetable Compound will bring back health, strength, and happiness.

It Made Me a Well Woman

Dear Mrs. Pinkham: -Lydia E. Pinkham's Vegetable Compound has done more for me than doctors or medicines. I suffered for four months with suppression of monthly periods. Headaches were a daily occurrence. Pains in my back and limbs made it hard for me to attend to my domestic duties.

The medicines I had taken did not help me, and I was in misery and despair until one day I read an account of your Vegetable Compound, and decided to try it, and I thank God that I did so, for it not only regulated my monthly periods, but made me a well woman.

MADAME CAROLINE MARTINEAU, 22 La Chapelle St., Quebec, Que.

Do not let disease make headway. Write at once to Mrs. Pinkham, Lynn, Mass. Her advice is free and will contain information of great value to you. Mrs. Pinkham is daughterin-law of Lydia E. Pinkham, and for twenty-five years under her direction and since her decease, she has been advising sick women free of charge.

Lydia E. Pinkham's Vegetable Compound Cures Where Others Fail

Our stock of rings is complete—all kinds and all sizes. If you are in need of a birthday ring come and see us. A Bloodstone for March. You shouldn't be withoutone. Or if you know a pretty hend on which withoutone.Orl you know a pretty hand on which you would like to see the sparkle of a handsomering, come to us. We can supply one that will please, and the price will be moderate.

A Scheme and a Luncheon. One of Balzac's wild schemes was a plan to combine Paris theaters. One morning in September, 1839-an early day to talk of monopoly-ten literary friends of the great novelist met by invitation at his house. Before luncheon Balzac told them of his scheme. His idea was to form a trust to buy up all the theaters as a sequel to a smaller preliminary trust for the supply of plays to every theater in Paris. The ten guests were to supply them. He estimated the profits of the first year at £120,000, and each year would, he thought, bring in more money. He expounded his scheme at length for over an hour, and finally one of the guests suggested that he might go on at ta-ble. The novelist started. "I forgot all about ordering anything to eat!" he cried, and late in the afternoon the members of the shadowy trust made a shadowy meal of bread and cheese and. sour wine in a small country rest

A story is told of the late Dr. Peddie, a Scotch minister, to whom his congregation had presented a pulpit robe. He had never worn a robe, and, after ac-knowledging the gift, he said he would *************** wait in the vestry five minutes after service to hear any objectors to the in-**************** novation, Nobody appeared but one old lady, who, on being asked what her objections were, answered that she had read the epistles of St. Paul and could not find any reference to the could not find any reference to the apostle wearing a gown. "What epistic did you read?" asked the doctor. "From Romans to Hebrews," answered the old lady. "Well, Janet," said her minister, "I have read from Romans to Hebrew also, and I could never find any reference to the apostle wearing the breeks. What would you think if you saw me going into the think if you saw me going into the pulpit without breeks?" Needless to say, the old lady departed satisfied with the explanation. *+++++++++++++++++++++++

Evolution of the Needle. Sewing needles of bone, stone, glass and bronze antedate all historic records, but those of iron, brass and steel are comparatively modern. Bone and glass needles have been found in Egyptian tombs that are known to be over tian tombs that are known to be over 4,000 years old, and similar domestic 4,000 years old, and similar domestic instruments of bronze and copper have been found in the mounds and burial caves of Europe and America which are believed to be much older than those found with the Nile mummles. The needle first appeared in its present form in European countries in the year 1410, but the art of making them was kept a secret for upward of 150 years after the date last given. In the year 1680 they were first made in the year 1680 they were first made in the American colonies, but at what point is a mooted question among the histo-

Minard's Liniment cures Burns,

Franklin's Sawdust Pudding. Franklin believed in fair competition in freedom for others as well as him self and cared more for his persona ndependence in the conduct of his business than for the business itself. The story of the sawdust pudding should be known in every newspaper office in the country. When he first started the Gazette he made some free comments on certain public officials, and some of the influential patrons of the paper resented it and tried to stop it. He invited them to dinner. When they came they found nothing on the table but a pudding made of coarse meal and a jug of water. They sat down. Franklin filled their plates and then his own and proceeded to eat heartily, but his guests could not swal-low the stuff. After a few moments Franklin rose and, looking at them, said quietly: "My friends, any man who can subsist on sawdust pudding, as I can, needs no man's patronage."

A Heavy Load to Carry.

A Heavy Load to Carry.

Along with dyspepsia comes nervousness and general ill-health. Why? Because a disordered stomach does not permit the feed to be properly digested, and its product a be properly digested, and in turn the nerves are not fed on good, red blood, and we see symptoms ef nervousness, sleeplessness and general breakdown. It is not head work, nor ever physical exertion that does it, but poor stomach work. With poor, thin blood the body is not protected against the attack of germs of grip, bronchitis and consumption. Fortify the body at once with Dr. Pierce's Golden Medical Discovery—a rare combination of native medicinal roots without a particle of alcohol or dangerous habit-forming drugs.

A little book of extracts, from prominent medical authorities extolling every ingredient contained in Dr. Pierce's Golden Medical Discovery will be mailed free to any address on request by postal card or letter. Address Dr. R. V. Pierce, Buffalo, N. Y.

Many years of active practice convinced Dr. Pierce of the value of many native roots as medicinal agents and he went to great expense, both in time and in money, to perfect his own peculiar processes for rendering them both efficient and safe for tonic, alterative and rebuilding agents.

The enormous popularity of "Golden Medical Discovery" is due both to its scientific compounding and to the actual medicinal value of its ingredients. The publication of the names of the impredients on the wrapper of every bottle sold, gives full assurance of its non-alcoholic character and removes all objection to the use of an unknown or secret remedy. It is not a patent medicine nor a secret one either, This fact puts it in a class all by taclf, bearing as it does upon every bottle wrapper The Badge of Honesty, in the full list of its ingredients.

The "Golden Medical Discovery" cures, weak stomach, indigestion, or dys

THE PLANET URANUS.

Oddities a Voyage to This Gigantie World Would Disclose. If Uranus, which is a star of about

the sixth magnitude, were a planet like those little ones called asteroids, which are being discovered by the dozen every year, it could not have much claim upon popular attention, but Uranus is really a gigantic world, more than sixty times as large as ours. Its vast distance, about 1,700,000,000 miles from the earth, is what causes it to look so small. Uranus has four moons, which revolve backward in their orbits—that is to say, they re-volve from east to west around Uranus, while Unanus goes, like all the other planets, from west to east around the sun. It is believed that Uranus rotates backward on its axis also. Moreover, the axis of that great, strange globe lies in such a direction that in the course of its year, which is equal to eighty-four of our years, the sun shines almost perpendicularly first upon one pole and then upon the other. Measured by our time standard, there are forty years of constant daylight, followed by forty years of unbroken night, around the poles of Uranus. And the sun rises in the west and sets in the east there. But the sun looks very small when viewed from Uranus—only one four-hundredth as large as it appears to us. Still it sheds upon that planet 1,500 times as much light as the full moon sends to

the earth, so that daylight upon Uranus, while faint compared with the blaze of a terrestrial noonday, is nev-

ertheless a very respectable kind of
