Montreal Stocks

Montreal Sept. 6—12:30 p.m.—The appearance early in the session of the Spanish River statement for the year ended June 30 was a considerable factor in the trading on the stock exchange this morning. Though the report was regarded as satisfactory the stock sold down, the common falling back to 101 and the preferred to 108, and afterward firming. As a whole pulp and paper issues were below onening prices, this applying to Abitibl, Brompton and Howard Smith. Orders for Montreal Power were being filled, and the prices advanced to a new high record at 1991, Steel of Canada rose almost to 80, and British Empire Steel was firm at 36.

heavy shipments from Central Europe counted somewhat as a bearish factor here. Besides, predictions of better weather for the domestic corn crop had a restraining influence on wheat bulls. The opening, which varied from unchanged figures to \(^1\_4c\) lower, was followed by a slight general setback. Corn and oats displayed strength at the opening, but soon eased down in response to a prospect of showers and cooler temperature. After opening unchanged to \(^1\_4c\) higher, the corn market declined all around to below yesterday's finish.

Oats started unchanged to \(^1\_4c\) higher, and all deliveries underwent something of a down turn later.
