CHANGE IN REGULATIONS RE LOWER SCHOOL EXAMINATIONS

The necessity for all pupils writing departmental examinations in lower school subjects has been removed, according to a recent circular published by the Department of Education. Pupils to be granted credit in any subject shall have completed the prescribed course of study in that subject and shall have passed comprehensive tests conducted by the teacher of the subject with a standing of at least fifty per cent. of the marks assigned to that subject in all the tests of the school year.

The regular departmental examinations will be held as usual and any pupil who fails to pass the teacher's test shall have the opportunity of trying again.

This regulation applies to the following subjects: Art, grammar, Latin, zoology, botany, Canadian history arithmetic, geography and physiology.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WATFORD HIGH SCHOOL TERM REPORT

The following is the standing obtained by the pupils of the Watford High School at the Easter examinations. Parents will receive after the holidays a fuller report which they are expected to carefully examine and to remember that the pass mark in any subject is 50. A failure to obtain at least that mark would mean that the pupil must do much better work in the next two months or forfeit their chance of promotion.
