

Miscellaneous.

Whirl of Religious Fervor.
CHURCH ALAR FILLED HIGH WITH OFFERINGS OF JEWELRY.

On Sunday morning, at one of the three more meetings at the American Theatre, more jewelry was given than at any of the previous ones.

On Sunday morning, at one of the three more meetings at the American Theatre, more jewelry was given than at any of the previous ones.

The programme on Friday evening was to include a series of short addresses on missionary work.

Agricultural.

More Potash Needed.
1. Fodder crops, pasture grasses, corn stover and hay all remove large amounts of potash from the soil.

2. The rise of our domestic animals contains about four fifths of the total potash of their excrement.

3. When urine is allowed to waste, the manure is poor in potash.

4. When manures are exposed to rains much of the potash, being soluble, is washed away.

5. Nearly all the special fertilizers are especially rich in phosphoric acid, and do not contain enough potash.

6. Superphosphates were the first fertilizer to come into general use among our farmers.

7. When a farmer buys a fertilizer, he still, nine times out of ten, calls for a phosphate.

8. As a result of the above conditions, our soils seem to be quite generally in need of more liberal applications of potash.

9. In the case of corn the need of potash appears to be particularly prominent.

10. For a good crop of corn the fertilizer should supply 100 to 125 lbs. of actual potash per acre; 200 to 250 lbs. of muriate of potash or one ton (2000 lb.) of good wood ashes will do this.

11. With ordinary farm or stable manure it will generally pay to use some potash for corn; 125 to 150 lbs. of muriate of potash has given profitable results.

12. The liberal use of potash means more clover in our fields, more nitrogen taken from the air, Friday milk in the fall, a richer manure heap, and storehouses and barns full to overflowing. It means also a sod which when turned will help every other crop.

13. For a good crop of corn the fertilizer should supply 100 to 125 lbs. of actual potash per acre; 200 to 250 lbs. of muriate of potash or one ton (2000 lb.) of good wood ashes will do this.

14. For oats, rye and grass, nitrate of soda applied just as the growth begins in spring has proved very beneficial; 300 to 400 lbs. per acre should be applied.

15. The liberal use of potash means more clover in our fields, more nitrogen taken from the air, Friday milk in the fall, a richer manure heap, and storehouses and barns full to overflowing.

16. For a good crop of corn the fertilizer should supply 100 to 125 lbs. of actual potash per acre; 200 to 250 lbs. of muriate of potash or one ton (2000 lb.) of good wood ashes will do this.

17. With ordinary farm or stable manure it will generally pay to use some potash for corn; 125 to 150 lbs. of muriate of potash has given profitable results.

18. The liberal use of potash means more clover in our fields, more nitrogen taken from the air, Friday milk in the fall, a richer manure heap, and storehouses and barns full to overflowing.

That Pie

I had for dinner was the best I ever ate. Thanks to COTTOLENE, the new and successful shortening.

ASK YOUR GROCER FOR IT.

Made only by N. K. FAIRBANK & CO., Wellington and Ann Streets, MONTREAL.

Teas. Teas.

I am now offering to my customers the FINEST LOT OF TEA ever imported to this market, direct from one of the best London Tea Houses.

Teas! Teas! Teas! In caddies or by the half chest, at wholesale prices.

50 Packages, small and large, FIRST-CLASS TEAS!

J. R. ELLIOTT, LAWRENCETOWN, N. S.

THE SUBSCRIBER HAS JUST RECEIVED AN ASSORTMENT OF Tweeds

Suitings Yarmouth and Oxford Mills, Suitable for the season of the year.
