KEEP TO THE FACTS.

The "Fort Steel Prospector" says: "We have one of the richest minerals districts on the American continent. It is as yet in its infancy so far as mining development is concerned. Each day is proving more and more the great value of our mines. All that is needed is money to develop them, and transportation for ores. We expect an influx of capital during the coming summer and we caution prospectors and claim owners, of the necessity for a strict adherence to facts in all statements in regard to prospects and mines."

The Russian Journal of Commerce gives the wheat stocks on February 13th at 28,640,000 bushels against 32,568,000 the previous month and 28,963,000 last year.

Wash goods departments in the various jobbing houses continue to show a good output, both on the spot and through mail orders, these taking in a full range of values from the low grade printed effects to the finer goods in both printed and woven styles. The demand for wash goods is noticeable for its variety as well as individual volume, and buyers evidently recognized the advantage of being able to place before their customers such a wide assortment of fine printed and woven fabrics as are now available.

ROOFING!

Sparham Fire-Proof Roofing Cement Company.

The only roof that has stood the test of the Canadian climate, for twelve years it has given nothing but the most perfect satisfaction. All other cement roofs have been utter failures.

All roofs laid by Camobell & Co. have the guarantee of the Sparham Company, which has \$50,000 capital paid up—a substantial guarantee—not on paper.

Roofs laid in Montreal with our cement TEN YEARS ago are as good to-day as when laid and have had no repairs.
