CANADIAN OVERSEAS HOSPITAL.

Canada has established in Great Britain, France and at the Dardanelles no less than sixteen Canadian hospitals. And when I say Canadian hospitals do not understand me as meaning that they are for wounded Canadians alone. They are for all the forces of the British Empire. Eight of them are located in Great Britain, five are in France and three are at the Dardanelles. On the staffs of these hospitals we have 2,400 men and 525 splendid nurses, all of them Canadian young women. (Applause.) I desire here to say this further: I have seen nearly fifty hospitals while abroad, and I venture to say there are no hospitals on the continent of Europe to-day that are better equipped, better organized, or in which the wounded receive better care and attention than the hospitals which have been organized by the people of Canada through their Government. It is a great satisfaction indeed to know that the men who have gone through the battles of the Empire as our Canadians have done receive in the hospitals, whether British or Canadian, every attention possible.—Speech by Sir R. Borden.
