Carbampton addressed himself to Major Sirr: "So you've settled to spring the mine to-morrow and blow up the United Society in Bridge street ?" To morrow, God willing," the major re-

sponded, with the impressive air of one embarked in an enterprise whose magnitude and importance conveyed a sense of vast responsibility, "we shall let slip the bounds and bag the covey. Armstrong, who dined yesterday at Lord Edward-Fitzgerald's, and keynolds, who spent the evening before with Byrne of Ballymanus and Oliver Bond, inform us that a crisis is at hand, and the well-organised plans of the leaders culminating to a decisive point of action; hence, as delays are dangerous, and they have noticed us that Lord Edward and a full committee sit to-morrow, Lord Castlereagh, with whom I have conferred, is of opinion the sooner we pounce down and make a mess of the business the better; and my Lord Novbury may count on't that out of all the arrests we anticipate making he will be called on to prescribe hemp to some of 'emha! ha! ha!"

"I'll, as State physician, cheerfully contribute my poor quota of service to bleed, asphyxiate, or purge it by any other means that may be deemed desirable of its mulady," responded the judge, with a vivacious smile that contrasted pleasantly with the major's dreary laugh. "By the by," he added, with blithe humour, "I fear poor Clonmel's term of service is nearly expired; never saw a man so tottering. Did ye hear what that little beast Curran said the other day as he passed us by at the review in the Park? 'My poor fellow,' said he, en passant, with his confounded comical grin, don't be in such a hurry to set off to your estate in Hades; we're going to have some prime sport; pray for an extension of leave to enjoy a few more capital convictions; and who knows but Norbury and a few might be ready to accompany you. 'Tis lonesome for a man to go by himself to a terra incognita, where he mayn't be quite sure of his welcome. or whether the inhabitants be friends or foes.' Wasn't that execrable taste?"

"Atrocious!" cried Claudius Beresford. "But that little animal seems to be voted a free-lance by common consent. He lately came athwart Lord Clare, not in the m st hurried along at his usual speed: 'I say, friend, don't forget to fetch your pistols when you take passage in Captain Charon's boat across Styx; you may find them useful. Have a shot at Pluto, Rhadamanthus, or any obstreperous ghost that thwarts you. My uncle would have knocked down any other chap in a jiffy, but Curran he feigned not to notice. Apropos, Carhampton, how speeds your suit with Donna Florinda? She is, to my notion, the finest girl in the world."
Lord Carhampton puffed out a volume of plumy smoke, but made no response, as with hands in fob and eyes half closed he luxuriously inhaled the vapoury fumes, whose nar-cotic essence soothed his faculties in delicious languor. The Sham Squire grunted audi-

"Not unlikely; the're a pushing lot," said Lord Carhampton, stending up to go; "and I never knew a good thing in the market but the parson is sure to snatch at it. More than once I've detected the reverend brother casting sheep's eyes at my game; and only that I can see he hasn't a chance, and is a useful tool disposed to my service, I'd soon twist his neck the other way; au revoir, ami." His tordship withdrew, in company with Lord Kingsborough, deeply pendering the expediency of twisting Lyenrgus Poinfret's neck on his own account, and removing from his path a rival in favor of the

pretty Ethel Courtney. Presently, Squire Higgins's carriage being announced to take him to the courts with the judge, a levee en masse of the morning visitors ensued, and the apartment was soon left empty. Majors Swan and Sirr, walking soon after, arm in arm; down Sackville street, came upon a knot of gentlemen, con-versing apart, not far from one of the principal hotels; to judge by their varied gestures-eager, earnest, excited, and vigilant-they were discussing some theme of interest, in which, however, they were not so absorbed as to be inattentive to the approach of the majors, in whose presence, acted upon as by a spell, they simultaneously became silent and reserved. Coming up and halting, Major Sirr, whose keen eye took in all at a glance, politely ac-costed one prominent among the rest, and said:

"Good-morning, sir; I was sorry for the contretemps that deprived me of the pleasure of meeting you a few days ago at my friend Mrs. Hodgens'. I'm glad, however, you have got news of the little girl. Sad scamps those youngsters are !"

"Thank you, major," returned Hugh O'Byrue, with calm, grave smile. "'Tis all right; my brother wrote to let me know the foolish child ran away after the servant to whom she was attached left; fortunately they met on the road, and all arrived home

safely." "The boy Ned Burke, I understand, went with them," said the major, with a signifi-cant look at Hugh, who answered, without embarrassment, vet evasively :

"No doubt, sir, your multiplied sources and means of information are quite reliable; but since the boy left me I have made no further investigation about him, nor can I give you the smallest information that might set you on his track. If, as you assert, he has been guilty of the charges brought against him, he will do his best, no doubt, to elude pursuit."

"He'll be clever if he elude me!" growled the major, withdrawing, after a searching glance at each of the group, all of whom he well knew by sight, and some of them sufficiently to take off his three cornered hat to. When he had removed far enough to be out of hearing, Hugh turned and resumed the interrupted thread of his speech; he said, addressing collectively the circle of his audi-

tors. "Now, I am not myself what might be termed a good physiognomist, nor am I gifted with a shrewd perception of character, as is my brother Miles, whose judgment in deciphering these hieroglyphics I have never known to err; yet from my brief acquaintance with Captain Armstrong, when we met at dinner in your house at Frescati, Lord Edward, and from what I saw of Reynolds, whom I met the other evening with you, William, I entirely corroborate the opinion of Miles, and warn you that I mistrust these two men.'

"But, my dear friend," said Lord Edward, hurriedly, "if we go on this way, in whom shall we repose confidence? Suspicion and over-caution may prove our bane, as well as too confiding trust; weak, diminity applications of a foe in everyf ace, and high; carries too much head to my likin. I wonder, my lord, that, as money ain't will rarely achieve emprise allotted but object, you wouldn't fancy a more window to the bold and hopeful. Is it not so, Bond?" AN ALARMING DISEASE AFFLICTING A NUMEROUS CLASS.

The disease commences with a slight derangement of the stomach, but, if neglected, it in time involves, the whole frame, embracing the kidneys, liver, pancreas, and, in fact, the entire glandular system, and the afflicted drags out a miserable existence until death gives relief from suffering. The disease is often mistaken for other complaints; but if the reader will ask himself the following questions, he will be able to determine whether he himself is one of the afflicted : Have I distress, pain, or difficulty in breathing after eating? Is there a dull, heavy feeling attended by drowsiness? Have the eyes a yellow tinge? Does a thick, sticky, mucous gather about the gums and teeth in the mornings, accompanied by a disagreeable taste? Is the tongue coated? Is there pain in the side and back? Is there a fullness about the right side as if the liver were enlarging? there costiveness? Is there vertigo or dizziness when rising suddenly from a horizontal position? Are the secretions from the kidneys scanty and highly coloured, with a deposit after standing? Does food ferment soon after eating, accompanied by flatulence or a belching of gas from the stomach? Is there frequent palpitation of the heart? These various symptoms may not be present at one time, but they torment the sufferer in turn as the dreadful disease progresses If the case be one of long standing, there will be a dry, hacking cough, attended after a time by expectoration. In very advanced stages the skin assumes a dirty brownish appearance, and the hands and feet are covered by a cold, sticky perspiration. As the liver and kidneys become more and more diseased, rheumatic pains appear, and the usual treatment proves entirely unavailing against this latter agonising disorder. The origin of this malady is indigestion or dyspensia, and a small quantity of the proper medicine will remove the disease if itaken in its incipiency. It is most import ant that the disease should be promptly and properly treated in its first stages, when a little medicine will effect a cure, and even when it has obtained a strong hold the correct remedy should be persevered in until every vestige of the disease is eradicated, until the appetite has returned, and the digestive organs restored to a healthy condition. The surest and most effectual remedy for this distrussing complaint is "Seigel's Curative Syrup," a vegetable preparation sold by all Chemists and Medicine Vendors throughout the world, and by the proprietors, A. J. White, Limited, 17 Farrington Road, London, E.C. This Syrup strikes at the very and branch, out of the system.

How FARMING PAYS.—The Experience of Forty Years of Successful Farming and Gardening, by the Authors, William Crozier and Peter Henderson, New York: Peter Henderson & Co. This is a valuable work to all those who are interested in farming or gardening. The authors are recognized authorities on all subjects pertaining thereto. Mr. Crozier has had twenty years practical experience, and is widely known in the United States as one of the most success ful exhibitors at Agricultural Fairs. Mr. Henderson has already published a book, "Gardening for Profit," which has stamped him as an authority. In the present work Mr. Henderson tells in plain words the manner of growing such vegetables and fruits as can heat he made profitable on the farm, besides interchanging with Mr. Crozier his opinion on such operations on the farm as his long practice in cultivating the soil enables him to do. It is a volume of 400 pages got up in the very best style of the printing and binding, and is illustrated with numerous engravings illustrative of the subjects treated of. This work is one of the that could be placed in the hands of the pub-lic. The author wields his pen in the cause of religion with vigor and with eloquence. The plan of the work is thus set forth by His Lordship:—"I first endeavor to show what Catholic Christianity is as a whole, regarded from the point of view of a believer; how all its doctrines, mysteries, sacraments, worship and practices, spring from a right understanding of the great mystery-God in the flesh, which forms the basis of all revealed religion. I then carefully eliminate this body of doctrine from the misunderstandings and mi-representations to which it is commonly subjected, distinguish it from the doctrines of Christian sects, and explain fully these differences on the important questions of Justification, Free will, Grace and Predestination. If at times this leads me into the path of controversy, I have been careful to turn aside from the well-beaten track as soon as it was possible, satisfying myself with noting, in characters that cannot be mistaken by ordinary intelligence. the essential marks true Catholic teaching. When this has been effected, and Catholic Christianity stands forth in its dogmas and practices as I revere and love it, and as I believe it is revered and loved by the two hundred millions of my fellow Catholics throughout the world, I contrast its sublime grandeur, its venerable antiquity, and its unchanging truth with the fascinations of unbelief." The Right Rev. Dr. Ricards left his native place, Wexford, Ireland, thirty-five years ago, to devote his life to missionary labors in South Africa.
