

**MASSEY-HARRIS
CULTIVATOR.**

The greatest cultivating implement ever invented.

Will cultivate the hardest clay land with great facility.

The patent "Helper" prevents the breakage of teeth.

The Steel Sections are perfectly flexible, even when full pressure is applied.

The depth of work can be easily and perfectly regulated.

One lever does it all—puts on the pressure, or, when reversed, lifts the teeth up for transportation.

Four Steel Sections carry the Teeth.

New Patent Movable "Tooth-Seat" is a great achievement. By this plan, the teeth may be so divided up as to make the Cultivator into a Scuffler for cultivating corn, beans, potatoes, etc.

Thus one implement takes the place of several different tools.

A seed box with new improved scattering apparatus is made to go with the Cultivator. When thus equipped it makes a perfect Sectional Seeder.

A Grass Seed Sower is also adapted to this multum-in-parvo machine.
