

is purchased from the Commission until such time as private users in the United States are permitted to acquire title to uranium enriched in the isotope U-235.

The Government of Canada, or its appropriate agent, will give to the Commission a first refusal of any special nuclear materials which the Government of Canada may desire to transfer outside of Canada, where such special nuclear materials have been produced from the irradiation of fuel elements enriched with U-235 purchased from the Commission under the terms of this Agreement.

In addition, any special nuclear material transferred by Atomic Energy of Canada Limited to the United States may be re-transferred to Canada on such terms and conditions as may be agreed.

B. The Commission will continue the present understanding with Atomic Energy of Canada Limited, a wholly-owned corporation of the Government of Canada, covering the sale of uranium of normal isotopic composition for use in the NRX and NRU reactors.

The Commission will also sell to Atomic Energy of Canada Limited such quantities of uranium of normal isotopic composition, and to the extent practical in such form, as may be required for the power reactor programme in Canada and under such terms and conditions as may be agreed, subject to the availability of supply and the needs of the United States programme.

C. The Commission will continue the present understanding with Atomic Energy of Canada Limited, a wholly-owned corporation of the Government of Canada, covering the sale of heavy water for use in the NRX and NRU reactors. The Commission will also sell to Atomic Energy of Canada Limited, under such terms and conditions as may be agreed, such quantities of heavy water as may be required in the power reactor programme in Canada, subject to the availability of supply and the needs of the United States programme.

D. It is understood and agreed that the existing contract between the Commission and Atomic Energy of Canada Limited relating to the sale of plutonium, and extensions thereof, will continue in full force and effect.

E. Collaboration between the two countries in the field of raw materials has resulted in the development of substantial uranium production in Canada which has been made available to the United States under arrangements and contracts now in effect. These arrangements and contracts shall remain in full force and effect, except as modified or revised by mutual agreement.

F. As may be necessary and as mutually agreed in connection with the subjects of agreed exchange of information as provided in Article II, and under the limitations set forth therein, specific arrangements may be made from time to time between the parties for lease or sale and purchase of non-research quantities of other materials under such terms and conditions as may be mutually agreed, except as provided in Article VII.

ARTICLE VII—*Materials and Facilities Primarily of Military Significance*

The Commission will not transfer any materials under Article III A or Article VI F and will not transfer or permit the export of any materials
