

ensuring that such identified material will not further any military purpose and that effective application of the safeguards provided for in this Agreement shall be feasible;

(b) require the maintenance and production of adequate records to assist in ensuring accountability for identified material, and call for and receive periodic reports based on such records;

(c) satisfy itself that the means to be used for the chemical processing of identified material after irradiation will not lend themselves to diversion of identified material to military use;

(d) send representatives, designated by it after consultation with the other Contracting Party, into the territory under the jurisdiction of the latter, which representatives shall have access at all times to all places, equipment and facilities where identified material is used, stored or located, to all data relating to such identified material, and to all persons who by reason of their occupation deal with such identified material or such data, as may be necessary to account for all identified material and to determine whether such identified material is being used for peaceful purposes only. Such representatives, provided they shall not thereby be delayed or otherwise impeded in the exercise of their functions, shall be accompanied by representatives of the other Contracting Party if the latter so requests.

2. Subject to their responsibilities to their respective governments pursuant to the provisions of this Article, representatives and other officials of either Contracting Party who by reason of their official duties arising from the provisions of this Article might acquire any industrial secret or other confidential information shall not make any disclosure of such information.

3. Each Contracting Party, if it has determined that identified material is furthering a military purpose, shall have the right to call upon the other Contracting Party to take corrective steps and, in case such steps are not taken within a reasonable time, shall have the right to suspend or cancel scheduled delivery of source material, special nuclear material and fuel, and to require the return of all identified material under the control or within the jurisdiction of the other Contracting Party.

4. It being the intention of the Contracting Parties to avail themselves of the safeguards facilities created by the International Atomic Energy Agency, the foregoing provisions of this Article shall apply until the Contracting Parties have concluded an agreement with the Agency to transfer to the Agency the administration of the safeguards called for by the present Agreement. The Contracting Parties shall, therefore, consult together with a view to making a request to the International Atomic Energy Agency to apply safeguards, in such respects and to such extent as the Contracting Parties may from time to time agree, in accordance with Article XII of the Statute of the said Agency. Consultations looking to such agreement shall take place upon the request of either Contracting Party.

ARTICLE VI

1. For the purpose of this Agreement, except as otherwise specified therein,

(a) "Equipment" means any apparatus, device or machine of particular utility in research, development, use, processing, or storage relating to atomic energy activities;
