¹ This category covers all aid channels, including bilateral aid, support for Canadian and international non-governmental organizations, the humanitarian assistance program, institutional co-operation, the industrial co-operation program and the Canadian Local Initiatives Fund.

² Multilateral transfers of Canadian ODA by country, made by international financial institutions, multilateral organizations and the World Food Program, have been calculated based on a coefficient. This coefficient is established based on the disbursements made in each country by each institution, and then applied to Canadian ODA paid to the same institution for the same period.
