

ours. It is with this intention that we have secured and translated the three films from the "American Social Hygiene Association", namely. — "Modern Diagnosis and Treatment of Syphilis"; "Gonorrhoea in the Male", and "Social Hygiene for Women".

I must here proffer my thanks to Dr. Walter Brunet, delegate of this admirable Association, for the courtesy and service he rendered us so willingly.

These films, Gentlemen, are at the disposal of Medical Societies and Faculty of Medicine in our various Universities.

We contend, and in this you will second us, that they will be of great value to all, for they sum up and show clearly the modern scientific method of diagnosis and treatment of syphilis and gonorrhoea, in an admirable manner.

Again with the object of assisting the physician, we will publish a monthly report, showing the progress of the campaign and also a manual of "Methods of Treatment", which current practice shall have proven to be the most effective. This will be a valuable scientific work for the physician and one which will help him in disentangling himself, from the encumberment of non-scientific literature, with which the manufacturers of drugs and patent preparations submerge him.

In return for all these advantages offered to the Medical Profession, we hope that the declaration of Venereal Diseases, which we believe to be indispensable in the execution of our campaign, will be favourably received and scrupulously performed by the physicians. Without the declaration of cases, that would guide our movements, we will be forced to walk in the dark, and as a result, our efforts will be in vain. But with these, we will compile general statistics, and know the real extent of venereal disease in our Province. Due to them, we will be able to judge what progress we have made; statistics will be the pulse of our organization. Declaration of cases, such as desired, should raise no objection, either on the part of the patient or the physician, because the name of the patient is non-essential, and his reputation and incognito will be protected by means of using a serial number to denote his case.

Let all of us, Gentlemen, therefore unite our efforts in making a success of this campaign and as a result, enhance the level of public health, for the good and honour of our whole country.
