PROTEST AGAINST CARS ON SUNDAY

Large Deputation Objected to Toronto and York Radial

WOULD DISTURB PEACE

Tourists Living on Lake Sim-

Tourists Living on Lake Simcoe Want Quiet Sundays.

At a special meeting of the council on Monday night, Councillor W. J. Patterson, chairman of the property committee, he said, had gone carefully over the proposed Carnegle Library. The committee, he said, had gone carefully over the properties available and had come to the conclusion that the best site to be had was a lot now owned by the municipality at the corner of Lot and Main streets, which could be widened by purchasing an adjoining strip.

This was one of the objections to the Toronto and York Radial bill made by a deputation of church people from Newmarket. Aurora and other northern points to the government yesterday. The deputation was led by Rev. Thomas of Newmarket and fifteen churches were represented by ministers and laymen to the number of one hundred. The deputation was received by Hon. Col. Hendrie, T. Herbert Lennox and Lr. Forbes Godfrey, and consideration was promised.

was received by Hon. Col. Hendrie, I. Herbert Lennox and Lr. Forbes Godfrey, and consideration was promised.

People Against It.

Rev. Mr. Thomas thought the matter had been settled by petitions long ago. and declared that if necessary they could bring much longer petitions than were submitted a year ago. He knew that not mere than ten per cent. of the citizens of any one municipality could be induced to wote in favor of Sunday cars. He termed the runnign of cars on Sunday as nothing more than placing a commercial matter before the morals of the people. He pointed out that the legislature should stand between the railway and the protesting citizens, for the Sunday car would be a step in the wrong direction so far as the morals of all the northern towns were concerned.

Nev. Thomas stated that Rev. Mr. Rochester of the Lord's Day Alliance had requested that the bill should be amended so that the company might operate Sunday cars within the city limits, but not outside.

Dr. Godfrey, West York, essayed to a significant the Guise of the vorkingment.

ter before the morals of the people. He pointed out that the legislature should stand between the railway and the protegling citizens, for the Sunday car would be a step in the wrong direction so far as the morals of all the northern towns were concerned.

Are, Thomas stated that Rev. Mr. Rochester of the Lord's Day Alliance had requested that the bill should be amended so that the company might operate Sunday cars within the city limits, but not outside.

Dr. Godfrey, West York, essayed to champion the cause of the workingman, and was brought to task by Ex-Mayor Urquhart, who fixed the Sabbath as a legal and moral day of rest.

Among the ministers present were: Rev. Mr. Hall. Christian Church, Newmarket; Rev. Mr. Stewart, Methodist Church, Aurora; Rev. Mr. Despard, Anglican Church, Richmond Hill.

Traffic on the Metropolitan Railway

WAS ACCIDENTAL

Last night the value of this unit was fixed at \$60; then, by merely computing the pre-determined percentages on this basis, and substituting the new values on the plan, the whole central part of the village was roughly assessed. Now, corrections will have to be applied to these gross values, which will take into account the various factors they possess, and this will be done by means of various formulae and tables compiled by W. A. Somers, the inventor of the system.

The highest values in Weston lie along Main street, and on the north side. Only once do the south side values exceed the north—near Coulter avenue, where the values are approximately \$21 and \$18 per unit foot. King street averages \$20, George street \$20, Dufferin street \$12 to \$30, St. John's road \$18, and so on, according to their estimated precent, worth of the unit foot around John and Main streets.

The work of appraisal will probably be continued throut the week.

Make Roads "as Smooth as Velvet"

Do you know the Cushion Frame Bicycle? It is without question the finest riding wheel in the world—has an air cushion post that absorbs all shocks and prevents the rebound that comes from riding over rough roads, keeping the vibration and the jar from reaching the rider.

It has a flat 3-plate spring, just at the rear of the crank-hanger, that acts in conjunction with the air cushion, so that it makes the distance between the saddle and the pedals constantly the same, and still further absorbs the shock and jar of a rough road, and has the Sills handle bar that

likewise takes the shock and jar from the handle bars. It adds immeasurably to the pleasure of cycling, and makes it a real sport to those who have never before been able to get the proper amount

of enjoyment from this healthful outdoor exercise. Before purchasing any wheel, be sure to investigate

The Cushion Frame Bicycle

Its simplicity of construction affords nothing to get out of order. Repairs are rarely needed on any part of this beautifully made machine. This, in the first place, because it is built of the very finest material by the "makers of the world's best bicycles," and in the second place because the cushion frame construction greatly reduces the wear and tear on the wheel.

And remember, the spring and cushion feature of this bicycle are fitted to YOUR particular weight. It is a bicycle made specially for YOU. All cushion frame bicycles are also fitted with the famous Hercules Coaster Brake, the finest coaster brake in the world. It has no side arm, and allows the rear wheel to be very quickly and easily removed and replaced in the frame. It is a free coaster but it has quick and sure action, gripping immediately at any time that you desire. It responds to the slightest touch of the pedal, and is wonderfully efficient in braking power.
