

The Improved Allis Band Mill

Has new extended base plate, securing a foundation on all sides of band—no bearings overhang foundation.

Saws are inserted through opening in base—every part of ample strength.

The heaviest Band for its size built.

The Plain Double Cutting Allis Band

as shown in engraving, is simple, easily handled—with the appliances we furnish—increases output 30 to 40 per cent. at no increased cost for labor.

Saws and mill as easily cared for as a single cutter.
