Golden City

Porcupine's Big Town

LONDON EVTHUSES ON THE PORCUPINE

Lake Property-Negotiations Under Way.

London is everywhere conceded to be the greatest, yet withal the most ultraconservative, mining centre in the world, consequently when Throgmorten and Threadneedle-streets, the nucleus of the financial part of the city, begin to take an interest in any new mining camp, that is, per se, sufficient reason for the rest of the world to sit up and take notice.

The advance in Ophir last week was due to an investment appreciation of the changed condition at the mine, to-sether with the extremely low prices which the stock has reached.

At the current price of the shares, the valuation of the Ophir property is below \$140,000, and comparisons are being made with the Beaver, whose market value is \$750,000 and the Tim-

and take notice. That Porcupine is receiving a great deal of attention from mining interests in the old world metropolis, cannot be gainsaid. Every day brings news of this or that group of English capitalists who have sent out their engineers to the Ontario gold camp, and from all present indications London financial circles are on the verge of taking hold of the Porcupine with that acugreatest owner of gold mines in the

It was announced on Saturday that M. A. Teague, the man behind the Dome Lake Mining Co., Limited, had Dome Lake Mining Co., Limited, had entered into negotiations with English men of capital for the sale of the Dome Lake property. The story is told somewhat like this: About ten days ago Teague received thru the correspondents of a big London bank a request to put a price on the property. This was done, and a 48-hour option was granted. Considerable cable correspondence of Considerable cable correspondence found in trenching, and this yein will in Mr. Teague's departure for the

PORCUPINE CITY. May 10.—(From able at the offices from the exchanges Our Man Up North.)—With under- in Toronto, and from the New York ground development work to the amount of 590 feet, the Scottish-Ontario stand third in the Porcupine list. only being headed by the Hollinger with 2000 and the Dome with 1200. The PRICE OF SILVER.

Vipond runs a close fourth with 285 feet. The Rea comes in as fifth with a swaft down 200 feet. At the Scottish-Ontario Engineers Dempster and Thornton, representing the McArthur-Forest Engineering Co. are busy surveying the interior of the mine. As this corporation is a closed one, little or no information is giv

The main work now is to drive t main cross-gut another 80 feet to north, to pick up what Engineer M Laren believes is the biggest vein. T cross-cut has already been carried i feet to the north from the main doul compartment shaft. Three shifts a working, in order that the feat may accomplished as soon as possible.

Veins uncovered in the cross-cu and drifted have been thoroly sampl and reported on. The work is being done thoroly and systematically, an not till the syndicate are satisfied wi what they are able to uncover, will a nouncements as to the future intention

of the owners be made. Owners of property in this localit thru which the mineralized zone tends, have been greatly benefited the work of the Scottish syndicate, as should soon be in a position to know the values located at depth in the sy dicate's holdings are sufficiently exte sive to warrant a like expenditure unprospected lots. The width of t main vein tapped on this property from seven to eight feet.

Porcupine City Townsite

The site selected by the first settlers in the Porcupine goldfields, who had the whole lake district to choose from, is admittedly the most suitable townsite location in that district, both from a business standpoint and from the standpoint of health and pleasant surroundings - a site central for the large working mines, at the convergence of the main traveled roads and all on high, well-drained land.

With the Porcupine postoffice in the townsite, with the government townsite adjoining, and with the main station of the T. & N. O. R. R. less than half a mile away, Porcupine City townsite lacks none of the essentials of a permanent town.

For particulars as to business opportunities in the townsite and for prices of lots, see or write

CHAS. C. MacGREGOR, King St., Porcupine City

MORE INFORMATION

What we have told you of ELDORADO PORCUPINE MINES, LIM-

Every statement made has our absolute endorsation, and further particulars of doings on the company's properties will be given out in bare facts. ELDORADO is too good a proposition to need any fictitious coloring. A gang of men has been engaged to start work on ELDORADO and development work will in all probability start next Monday under charge of Harry Bush, M.E., an engineer of experience.

ELDORADO'S 120 acres will be thereby proved up, and unless expert mining knowledge is at fault, ELDORADO shareholders will be proud of their holdings within a few months.

A business directorate, the low capitalization of \$500,000 and the **ELDORADO** shares selling at 10 cents, embraces material of opportunity for an investment such as we have seldom if ever seen presented during our 16 years in this business. Orders for **ELDORADO** or other shares have our personal attention and care.

A. J. BARR & CO., 43 Scott St., Toronto Members Standard Stock Exchange.

CORRECT INFORMATION

Knowing the mining market in all its ramifications, and having first-hand information from Porcupine, we are in a position to know when a stock is worth purchasing. We advised the purchase of REA yesterday. We do so again to-day, and if reasons are wanted to back our opinion we will supply them.

PORCUPINE is going to be a big camp, bigger than most people think.

Those who buy the stocks with speculative opportunities now will shake hands with themselves within the next few months. All orders for mining securities executed on the Standard Stock Exchange. J. T. EASTWOOD, 24 King St. W., Toronto Member Standard Stock Exchange.

REA MINES LIMITED CAPITALIZATION: \$1,000,000. Par Value of Shares \$5.00

Recent reports from our Porcupine office are very optimistic on Rea.

At the moment they have the deepest shaft in the camp, being down 210 feet. The fact that the controlling interest is held by The Consolidated Goldfields of South Africa and that the Bewick Moreing Company are consulting engineers, lends an air of solidity to this company.

In our opinion "REA" shares are intrinsically worth much more than the present market price, and should be selling on a par with Hollinger. We have no hesitation in strongly recommending the purchase of this stock.
