28	Fri.	47	40	45	39	7 51	Sets.				

**FEBRUARY.**—A practical farmer says: "I have worked a horse all winter long on carrots and hay, with better health, with equal effectiveness, and with less expense than on hay and oats. All horses will not eat them readily at first, but all will soon learn, and they are never clogged by them. I think parsnips are equally good; certainly they are equally acceptable to the animal. I leave it to chemists to ascertain the relative proportions of starch and sugar, of phosphates and nitrogenous matter in each. Carrots are the root we prefer for late spring feeding, as they keep better than turnips and most other roots. With good hay and carrots the horse will hardly feel the want of fresh grass."

1862.]
