TWO KINDS OF SUCCESS

A Thought Suggested by Some Striking Business Statistics

It has been stated that of 100 men who go into business 97 fail. Poorly they may fail of laying up great material wealth from their efforts, but whether they really fail cannot be told from outside observation. Their very failures along material lines may have been their greatest success in fact. Material success would have ruined them for a long time.

So outward success cannot be used as a criterion of the true success, which lies in using the word rightly, in order that the answering echo may be helpful and harmonious. A great national prophet once told the Hebrew people in what direction lay their true success—namely, in the way of spontaneous reason, the path to true and infallible guidance. He spoke (Isaiah xxxi, 21) in these memorable words:

"And they shall give you the bread of adversity and the water of affliction, yet shall not thy teachers be removed into a corner any more, but thine eyes shall see thy teachers."

And thine ears shall hear a word behind thee saying, This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left.

Happy are those who are thus spontaneously guided, for they are certain of the true success—Minneapolis Journal.

THE LADY BANK CLERK

(London Daily News)

Has the lady bank clerk come to stay? Opinions in banking circles would seem to be divided upon the point, and "The Bankers' Magazine," which during the last twelve months has given in its columns a course of lectures to ladies on elementary banking, contents itself with the present, and points to the golden opportunities women have of obtaining higher positions. Of the success of the experiment there seems to be no doubt. Women who were junior a year ago are said to be filling posts of responsibility, and in one case (at least) occupying the manager's chair; while lady cashiers are fairly plentiful. The lady bank clerk, however, is apparently not yet sufficiently suspicious of the casual customer, for one reads of "considerable losses not only through errors in cash, which are to a large extent preventable by experience, but also through fraudulent opening of crossings and raising of amounts."
