FOUND HUNDRED TUBERCULOSIS CATS

Cleveland, Ohio, Dec. 30.—That cats spread tuberculosis and are a menace to the family is declared by Dr. W. L. Ebor, of Lakewood, who within the last six months has dissected more than a hundred of the animals.

Among Dr. Ebor's patients was the head of a family who was afflicted with tuberculosis. From the history of the case the doctor was convinced that the family cat had brought the disease to the house. As a result he made an investigation. He offered money for cats, and a hundred or more were killed and examined.

"I found in all of them germs of tuberculosis," the doctor said. "Of course not all the cats were in the last stages of the disease, although at least thirty per cent. were in a serious condition. I venture to say that enough of the germs were present to make any of them a danger to a household. Cats prowl around in various places, and thus carry the germs with them. The household pets are a menace."

In connection with a despatch from Montreal to the effect that the shipping companies trading to the port of St. John are seriously considering a rearrangement of their schedules, which would mean a reduced service to and from the port this season, and giving as a reason for such action, the increase in harbor dues and decrease in freight offering, there seems to be a disposition here not to take the matter too seriously.

The major portion of this sum will go for wet goods, mostly champagne, although the fact that New Year's is arriving on Saturday night means that the sale of liquor cheer will cease promptly at 12 o'clock. Mayor Gaynor several days ago refused to countenance any suspension of the usual Saturday night rule, but it will be possible for consumers to purchase sufficient before midnight to last until any desired hour.
