

THE PLAGUE IN HONG KONG.

Emergency and Sanitary Corps
Fighting Dirt and Filth
of That City.

Ignorance and Superstition of Chinese
as Hard to Overcome
as the Disease.

The Hongkong Telegraph of May 28, the day before the Northern Pacific steamship Sikh sailed, gives the following on the plague and its ravages:

"The work of cleansing the infected districts is being vigorously carried on by the emergency corps of the sanitary board, which includes a number of police officers, under the supervision of the captain superintendent of police, Sergeant MacLure, and privates of the South and North Light Infantry and officers of the Royal Engineers, and a few civilians who responded to the call for volunteers. In view, however, of the enormous task which will be necessary to remove before the evil-smelling infection is even partially cleansed, it appears imperative that the strength of the corps should be greatly increased, and whole rows of sanitary tenements in the East street, Market street, Sai Hang lane, and Poyang tane are being thoroughly swept, whitewashed and disinfected, and that all the 'match-box' rookeries in those streets should be destroyed and the partitions removed, and the buildings found therein be burnt.

At present the disinfecting process is carried on only in houses where plague-stricken patients have been removed, and the consequence is that fresh cases are often discovered in houses close to those in which the plague-stricken men have performed their duties and most unpleasant task. The government now have reason, right and duty to make a clean sweep of hundreds of insanitary and pestilential hovels or shacks in the infected districts, and to remove them to a safe distance, and to replace them by a more sanitary and comfortable housing for the people.

At present the disinfecting process is carried on only in houses where plague-stricken patients have been removed, and the consequence is that fresh cases are often discovered in houses close to those in which the plague-stricken men have performed their duties and most unpleasant task. etc., etc., and that nearly all of these "tenements," now crowded with human beings, are unfit to use even as race-pony stables much less human habitations. But more of this anon.

Some misguided Chinese philanthropists have been very busy during the past few days distributing among the lower orders of their countrymen leaflets setting forth all manner of "cures" for bubonic plague. If these cranks would advise their hapless countrymen to promptly report all cases to the medical authorities for police, and form a fund to be used in purchasing blankets for use at the Glass Works hospital and the erection of respectable dwellings for their less fortunate countrymen, they would be doing real good, and one would think they would be justified in imputing their motives but to distribute anonymous and misleading leaflets is worse than useless, for not only is the cost of them absolutely wasted, but they constitute indirectly a hindrance to the authorities who are doing the utmost to cause the victims of the plague to abandon all attempts to cure themselves in their insanitary dwellings and as soon as they find themselves unwell lose no time in proceeding to one of the hospitals in quest of proper treatment.

News has been received here to the effect that the Nam Hoi and Pan Yu magistrates have, in accordance with orders from the Viceroy Li, issued proclamations, commanding the proprietors of the famous palanquin set forth in the placards posted in Canton on the 24th instant, and to which we referred on the 24th. Nothing is known yet as to the punishment of the men responsible for this offence—a barefaced insult which Europeans would lead to tremendous trouble.

The plague is now decreasing in Canton, but the exodus of the people goes on apace.

Two old women, residents of Tai-ping-shan, were fined \$5 each by Mr. Hastings at the police court this morning, owing to their having concealed the fact that they had lodged victims of the plague.

The Boletim Oficial of Macao publishes a notification regarding the epidemic; the supply of fresh water in the poorer districts is to be maintained with the greatest possible energy, the drains of the city are to be cleaned daily, especially in the most crowded Chinese quarters, and the streets are to be washed daily, all vessels coming from Canton or Hongkong are to be closely inspected and rigorously quarantined if found infected. All householders, Chinese or otherwise, are ordered to keep their premises perfectly clean and sanitary conditions, and open to inspection by the sanitary authorities, under heavy penalties.

Appended are the latest statistics.

From noon on Saturday until noon yesterday:

New Deaths Discharged and recovered cases

Hygiene 0 0 0 13
Kennedy-town 1 0 0 16
Glass Works 1 0 0 25
Private houses 0 10 0 0

Total 2 10 0 54

From noon yesterday until noon today:

Hygiene 0 0 0 13
Kennedy-town 1 0 0 15
Glass Works 1 0 0 25
Private houses 0 11 0 0

Total 2 11 0 53

Deaths from the outbreak (May 5th) up to May 28th, noon, 376; grand total, 432.

It was observed today for the first time that numbers of bodies have been buried daily without any record being kept as to where they came from; so that there is a large discrepancy between the burial statistics and the deaths reported. We were informed on Saturday that there had been altogether about 15 per cent. of burials in excess of the official mortality returns; but pending investigation we did not publish the statement. It is now ascertained by the special sanitary committee that ten or fifteen or even twenty corpses per day are brought to Tung Wah hospital and taken to the hospital for burial without even being recorded at all, without even being examined as to whether they are plague cases or not. This question is now receiving the attention of the authorities.

NAKUSP NEWS.

Doings of the Week as Reported by the Ledger.

(Nakusp Ledger.)

The lake has fallen six feet in the past seven days.

The damage to Kinalo by the recent flood will exceed \$75,000.

The floods caused sad havoc at Anthracite, but few buildings escaping destruction. Many of them were overturned, and several of them are lying bottom side up.

The track layers have now reached a point some distance beyond the Half Way house, and even the sceptical inhabitants of Denver have been forced to admit that there is something in the railway movement after all. Rates on ore from the head of the lake will be given shortly.

Trainmaster Hamilton, of the C. & K. R., was a passenger up on Friday's boat bound for headquarters, to consult the C. P. R. officials regarding the repairs made necessary on this road by the floods. The damages will amount to close to \$75,000.

Rev. James Turner held divine service in the school house on Tuesday evening. In closing his discourse he made farewell to the congregation, as he had been transferred by conference to Victoria. His successor will be Rev. Mr. Gable, recently stationed in the New Westminster district.

Cable News.

A dispatch from Christians, Norway, says that Goshard Gade, the American consul at that port, is celebrating the jubilee of his appointment to-day. A reception was tendered him this morning by the municipal authorities, and it was participated in by a number of resident and visiting Americans. Consul Gade was appointed in 1869 by General Grant, and, with the exception of Consul Sprague, of Gibraltar, is the longest serving American consul in the United States in the point of office tenure.

A Boon to Horsemen.—One bottle of English Spavin Liniment completely removed a cure from my horse. I take pleasure in recommending the remedy, as it acts with extraordinary promptness in the removal of hard, soft or catarrhal swellings, blood spavins, splints, curbs, swellings, and sprains. George Robt. Farmer, Markham, Ont. Sold by Geo. Morrison.

Record.

The North China Daily News says: The Imperial Chinese Telegraphs cut-off only sent us yesterday morning the following telegram received here, dated Hongkong, 28th May, 8:40 p.m. Shantung Samahui districts flooded two or three feet deep. Business stopped. Rice fields at Tungking and Fatsan submerged. River risen four feet two inches; 60,000 dead cattle collected this month. Plague decreasing Canton district.

A telegram received from Mr. Nakagawa, consul in Hongkong, on the 8th inst., as given in the Official Gazette, states that there were 577 deaths from the black plague between the 31st May and June 7th, 280 patients then being under treatment. The total number of cases up to the present is about 1200.

According to the Official Gazette, the following papers were suspended on the 8th inst.: Nichi Nichi Shinbun, Kokumin Shinbun, Shon Nippon, Chuwo Shinbun, Hoshi Shinbun, Tokai Shinbun, Tokei Shinbun, On Nichi Nichi Shinbun, and others. The papers were suspended in one day. The papers were suspended for printing Korean war news.

A curious story is told by the Western press regarding the anti-forgery bill which is now before the Japanese Diet. It is said that the bill is so framed that it will be impossible for any one to forge a document without being detected.

The Hongkong Telegraph says: The most noteworthy feature in connection with the epidemic now prevailing in the East is the fact that it is spreading rapidly. It is now in the midst of its most virulent stage, and is spreading rapidly.

IN FAVOR OF THE CUTTERS.

Conciliators Settle the Dispute
Between Contractor and
Stonemasons.

Contractor Adams Agrees to Pay
Jacob Dursi the Wages
Due to Him.

The council of conciliation, formed for the purpose of endeavoring to settle the dispute between William Adams, the contractor for the government buildings, and Jacob Dursi, a stonemason and the stone-cutters' union, met in the board of trade rooms this afternoon. The managers for the stone-cutters are: Andrew G. Hay, W.W. Thomas, and Robert Sargeant. They named as conciliators John Braden and J. G. Brown. The managers for contractor Adams are Mr. Spittlehouse, E. C. Howell, and A. Patterson.
