

MONTREAL HOMEOPATHIC HOSPITAL.  
TRAINING SCHOOL FOR NURSES.

This School offers a two years' course of training to women desirous of becoming professional nurses. A Committee from the Woman's Auxiliary, together with a Committee from the Medical Staff, constitute the Board of Control of the Training School. Applications for admission are to be made to the Superintendent.

Applicants must be between the ages of 25 and 35, in sound health, of good education, and furnish satisfactory testimonials as to character. A blank form of application will be sent, which is to be filled out in the applicant's own handwriting, and returned with the required references and physician's certificate to the Superintendent.

Immediately upon the arrival of a probationer, the Superintendent will subject her to an examination, written and oral, to ascertain her educational qualifications, and this will be followed by an examination by a member of the Staff of Physicians.

If the result of these is satisfactory, she will enter on the term of probation, usually one month, during which she will be boarded and lodged in the Hospital, but will receive no compensation. She will be subject to the rules of the Hospital, and be under the authority of the Superintendent of the Training School, who, in connection with the Committee, will at the end of the month, determine her fitness for work.

If approved, she will be accepted as a pupil, and must sign a written agreement to remain in the School for two years, and to obey the rules of the institution. For a period of not less than 12, no more than 18 months, at the discretion of the Superintendent, she will be employed in the wards of the Hospital, after this time she may be sent out to nurse private cases, and the remuneration received therefor will belong to the Hospital. A vacation of two weeks will be given her each year. A probationer should bring with her:—Two dresses, of gingham or calico, made plainly, six or eight large white aprons, two bags for soiled cloths, one pocket match-box, one pocket tape measure, one pin ball, one needle case, one thimble, one pair scissors, one lead pencil, one rubber, one pair comfortable noiseless shoes; as few things in the way of knickknacks of any kind as possible, and no expensive clothing. All clothing should be plainly marked with the last name of the owner. When accepted, nurses must provide themselves with one pair of forceps, two probes, one pair surgical scissors, and the uniform worn by the school.

After the first year, the nurses must provide themselves with one clinical thermometer, two catheters, one medicine glass, one hypodermic syringe, one warm wrapper, and one warm sacque.
