AR VERTICALS

Hear the truth in the new AR90, AR91 and AR92. The new AR verticals are designed for floor placement to give ultimate sound performance, and incorporate many of the outstanding features of AR's first vertical speaker, the AR9.

Such features include AR's most recent innovation, the Acoustic Blanket™.

All of the AR Verticals are waiting for you on your AR dealer's floor.

See him and hear the truth.

Anniversary Edition

AR25

In celebration of our 25 years of success in the high fidelity industry, we at AR have designed the new AR25 Anniversary Edition loudspeaker. On a price vs. performance basis, the AR25 offers you an unbeatable value.

The AR25 includes AR innovations found in the world-famous AR9. The AR25 is a two-way system with a vertical driver array to guarantee a crisp stereo image. In addition, the liquid-cooled tweeter uses magnetic fluid to dissipate voice coil heat, permitting greater power handling in the speaker. A two-position crossover switch adjusts the high-range level.

The substantial 18 litre enclosure, coupled with our own AR-made woofer, provides a solid bass response.

\$350⁰⁰ PAIR

* GIFT COUPONS FOR **SHURE**®
