

# Useful Information for the Farmer

---

---

**HOG AND CHICKEN CHOLERA.**—A judicious mixture of **Cow Brand Soda** and the animal feed will prove a **SURE PREVENTIVE** of this very prevalent disease among swine and poultry. It should be continued weekly. It is a prevention rather than a cure, and is harmless, besides keeping the animals in good condition otherwise.

**DAIRYMEN AND FARMERS** should use the **Cow Brand Soda** only for keeping milk cans clean and sweet.

**COWS.**—We call the attention of Dairymen and Farmers especially to this article. The yield of milk in cows can be greatly increased (without increasing the food) by giving one teaspoonful of **Cow Brand Soda** in the feed once a day. It takes about ten days to obtain the desired effect.

**COLIC IN HORSES AND CATTLE.**—Dissolve one-half pound of **Cow Brand Soda** in warm water. Put in a long-necked bottle, and pour the contents down the animal's throat. If the first does not prove sufficient, repeat in one hour. This applies to all cattle.

**HORSES.**—One tablespoonful of **Cow Brand Soda** to a pail of water, if given a horse to drink once or twice a week, will be found very beneficial, preventing worms, and is cooling and sweetening to the stomach, etc., etc. This also applies to all cattle.
