

## THE COW MACHINE

Difference in value in a cow is determined by her ability as a producer of milk or butter fat. This is recognized. A well informed Dairyman doesn't hesitate to purchase at a high price such animals as are reputed large milk and butter producers.

## DE LAVAL CREAM SEPARATORS

are indispensable to the Dairyman for the reason that as exhaustive skimmers, and for durability, convenience and right construction, no competitor has ever been able to approach its completeness.

Take the DE LAVAL into your business.

The De Laval Separator Co., 173-177 William St.  
MONTREAL.

## RAPID BUNDLE DISCHARGE

### No Tangles, Choking or Clogging

There's a big satisfaction in owning a Binder that ties securely, and delivers each bundle in perfect time with the other mechanism that cuts, elevates and delivers the grain to the packers. That's why our

## Improved No. 3 Binder

is so popular from British Columbia to Nova Scotia. C. W. Harper, Brandon, Manitoba writes: "After trying your Improved No. 3 Binder etc. cut in a very heavy piece of wheat (no acres), I felt satisfied that the machine was all right, and decided to try it. One thing I must say, it ties every sheaf, and elevates the grain. Each movement from the cutting of the knives to the discharge of the bundle promptly follows the other, like the movement of the train of clock-wheels. An important and indispensable part of the tying and discharge mechanism is the 'eccentric wheel' shown in cut near large pulley. This wheel is used exclusively on Frost & Wood Binders. When compressing and tying the chain pulls over the large spokes and makes a snug, tight bundle. When making a rapid discharge of the bundle and a quick return of the machine for the next sheaf.

This is one of twenty excellent points. Our book 'How to Buy a Binder' tells them all. Send for it and our catalog '10'. Both free.
