

The Man Who Buys This Silo Gets Two Cows FREE

WE have authority for saying that "Six Cows fed on Silage produce as much revenue in milk, cream and butter, as eight cows without Silage." Two more good cows would cost you \$110 each or \$220 for both so this Silo would pay you back \$220 the first year or the value of two new cows for every six cows you own. If you own fifteen cows, a Silo would give you the revenue of twenty. If a Silo gives you an increase of 33 per cent. revenue every year you use it, you are going to get one, of course. As an investment, you cannot beat it.

Wooden Silos Preferred

THE only reason most farmers hesitate about buying a Silo is that they are not sure which Silo to buy. The general experience is in favor of Wooden Silos in preference to any manufactured or home-made material. Our SILO BOOK gives useful Silo information with full particulars of our line. It shows why wood is better for Silos than brick, cement, tile or any other material. Glad to send it to you free. Write for it—NOW.

14 Reasons Why This Silo Should Be Yours

- (1) Made of two-inch selected White Spruce;
- (2) staves double tongued and grooved;
- (3) all wood parts creosoted which prevents rotting and shrinking and makes it acid proof;
- (4) steel splines in end of staves, making strong, airtight joints;
- (5) hoops, special steel, bent to fit, three bottom hoops 3/4 inch;
- (6) malleable iron lugs, frost proof;
- (7) special wrench supplied for tightening hoops;
- (8) doors fit perfectly, frame beveled and rabbetted to make absolutely airtight, doors close with three bearings on frame, each door fitted with adjusting door clamp;
- (9) doors can be instantly taken out or replaced;
- (10) window at top placed to allow entrance while filling;
- (11) roof provided with three supporting roof rings, with proper slope for rapid rain-shed, covered with high-grade waterproof roofing;
- (12) galvanized iron ventilator;
- (13) the location of window permitting a ton or two more storage capacity than ordinarily;
- (14) built like our famous Sprinkler Tanks, of which we make 90 per cent. of all used in this country.

THE Toronto Economy Silo is built high grade and extra strong and with extra care. We are prepared to show any prospective buyer that he can save money and have sweeter, better-conditioned Silage by buying his Silo from us.

Reclaim Your Swampland

Drain the marshes, irrigate the barren section of your farm, make your land pay a profit.

C.X.L. Stumping Powder

makes ditching easy and enables one man to do the work of ten.

Use C. X. L. Stumping Powder to blow out the stumps and boulders—to plant fruit trees, to break up sub-soil that the plows cannot reach. It's cheaper and saves time and labor. Safe as gun powder.

There is money in agricultural blasting. Send for our free booklet "Farming With Dynamite".

The Lily Bowl Gets the Cream

CREAM is worth too much to waste, yet it is being wasted by the ton every day by old-fashioned methods of skimming. Today there is no excuse for such waste. The Lily bowl gets all the cream it is possible to get, leaving only a drop or so to the gallon of skimmed milk.

Let's take a close look at this wonderful bowl. It is compact and convenient to handle. It lifts off the spindle, leaving the spindle in the separator where it belongs. It comes apart easily, but it can't leak. The disks provide a greater skimming surface than is found in other bowls. Combined with them are six cream gatherers—just twice the number other separators have. Separation begins the instant the milk enters the bowl, and there is always a clear passageway for the cream.

There is not even a cream regulating screw in the cream passageway. You make your cream thicker or thinner by regulating the amount of milk mixed with it, but thick or thin, you get all the cream when you use a Lily cream separator.

The bowl is not the only good Lily feature. The McCormick local agent, who sells Lily cream separators, will show you how every other feature is worked out just as carefully. See him or write us at the nearest branch house.

Roof with Paroid

WHAT looks like a saving in first cost, may in a few years prove a big expense. Paroid Roofing is so carefully made of tested materials, you avoid the repair bills that add heavily to the cost of a cheap roof. The first Paroid Roofs laid 18 years ago are still in good condition.

NEPONSET Paroid ROOFING

can be laid by yourself and your farm help so that in the wildest gale, the heaviest rain or snow storm, or while fire is raging, you need know no anxiety for your Paroid Roofs. Paroid is the roofing that will save you money. Made in Red, Grey and Green.

Look for the Paroid roll, by it you will know one of the 2,000 Neponset dealers in Canada.
