Shake well in a bottle and take a 4easpoonful dose after each meal and

The above is considered by an eminent authority, who writes in a New York daily paper, as the finest prescription ever written to relieve Backache, Kidney Trouble, Weak Bladder and all forms of Urinary difficulties. This mix-ture acts promptly on the eliminative tissues of the Kidneys, enabling them to filter and strain the uric acid and other waste matter from the blood which causes Rheumatism.

Some persons, who suffer with the afflictions may not feel inclined to place much confidence in this simple mixture, yet those who have tried it say the results are simply surprising, the relief being effected without the slightest in-jury to the slomach or other organs. Mix some and give it a trial. It cer-tainly comes highly recommended. It is the prescription of an eminent au-

thority, whose entire reputation, it is said, was established by it. A druggist here at home when asked stated that he could either supply the ingredients or mix the prescription for readers, also recommends it as

### PHYSICIAN OUTWITTED ROBBER.

### Backed Him Out of the House With an Empty Revolver.

Prof. Kovaevsky, the Czar's principal body physician, was the hero of a start-ling and curious adventure a few days ago at Kislovodsk, Russia, where he is spending his holiday. He was sitting in the study waiting for visitors when a the study watering for visitors when a strange man entered and presented him with a paper which made a peremptory demand for 30,000 roubles. The professor handed the paper back, saying that even had he the money he would not

give it to such a scoundrel.
"We shall see about that," said the robber, coolly, as he leveled a revolver

### EARTH IS HOLLOW.

### Rhode Island Professor Says It Is Also Inhabited Inside.

Dr. Orville Livingston Leach, scien Dr. Orville Livingston Leach, scientist and investigator, of Auburn, Rhode Island, says the earth is hollow. To get to this place, which is a land of great heauty, you have but to sair to one or the other of the poles, and quite without knowing it, your ship may go into an opening as if into a gastight globe and come upon a convex land. Once there it may be that you'll never come back. The professor doesn't say much about that.

# HOLYHEAD BEST PORT

MAY BECOME THE ENGLISH PORT FOR OCEAN MAILS.

American Postal Official Regards Holyhead as Best Port in United Kingdom.

In the race with the mails across the Allantic, in the present age of rush, every second saved is precious, and ecean post-offices are the very latest

time-saving device.

Special offices have now been established on many steamers, where marine postal clerks sort the mail at sea, and bave it ready immediately on the arrival of the boat. This saves from twenty-four to forty-eight hours' work

for the clerks ashore.

The whole question of accelerating

The whole question of accelerating the mail services on the liners is now being carefully considered by the international postal authorities.

J. T. McCleary, an assistant postmaster of the United States, has just returned to New York after a round trip to England and back on the White Star liner Celtic, and has reported on the working of the new system.

In his report just issued, Mr. McCleary expresses his opinion that Holyhead is the best English port for ocean

### QUEENSTOWN'S FATE.

This decision if acted on, will spell the doom of Queenslown as the mail port of call, and put Plymouth also out of the running in the mail race of the fulure.

When the Atlantic boats were slower and the mails smaller the disembarking of the American mails at Queenstown accelerated their delivery throughout the United Kingdom. Now, however, it is found that the time spent in six handlings of the letters between Queenslown and London is so great that no-thing is saved by using the old port. It is quite common now for vessels which have dropped American mails at Queenstown to come up to the Channel past Holyhead an hour or two before he mails-which have been travelling

across Ireland by train and the chan-net by fast boat—have arrived. Mr. McCleary estimates that if the mail steamers passed Queenstown and went direct to Holyhead with the bags it would improve the present time by at least six hours,

On the outward journey a steamer leaving Liverpool has to wait a con-siderable time at Queenstown for the extra mails, and this unduly lengthens

be journey.

The Cunard Line intends to make an in'eresting experiment this month. They will run one boat direct from Liverpool to New York, and she will te followed by a sister ship of similar speed, which will pick up the mails at Queenstown and show the exact loss of time entailed.

### TIME LOST.

The landing of the east-bound mails at Pllymouth instead of Queenstown or Liverpool suits London, but it means a considerable loss of time in delivery in other parts of the Kingdom, Ireland and North Scotland being the chief

### BRIBERY AN INSULT.

### Manager and Buyer of Berlin Factory Sentenced to Heavy Fines.

The manager and buyer of a large factory at Berlin, Germany, have been sentenced to heavy fines for an attempt to bribe two railwoy officials. The factory in question made a number of articles used on the Prussian State railways, and the railway officials had been entrusted with the duty of examining the goods before they were received. They at once reported the matter to their superiors, and action was taken, the factory people being charged with insulting Government officials. The manager and buyer of a large
