## REID NEWFOUNDLAND COMPANY.

Is your house really lighted from top to bottom or do you still have  
 to take a candle or lamp when you go to the attic or cellar at night?

A great many people who have electricity in the rest of the house  
 have no light in the cellar or attic because it is seldom needed; but, when  
 you do need it, you need it badly.

One Incandescent Lamp set in a Holophane Reflector will give sufficient  
 light for the darkest cellar or attic. Holophane Reflectors are  
 especially adapted to lighting places of this sort as they control the light  
 rays so that every ray is utilized. Wouldn't it be a convenience if you  
 could turn a switch and light your cellar or attic before entering? That  
 means an end to dangerous matches and flames—it means that you no  
 longer need stumble against misplaced boxes and bark your shins in the  
 dark.

We would like to tell you more about electric lighting and more about  
 the wonderful light-saving Holophane Reflectors. May we send a repre-  
 sentative to see you?
