# Everybody's Business

THE Ford Motor Company has made a genuine attempt to give the public automobile transportation at a price within the reach of all. It has carried out the ideals of the inventor of the Ford car, Henry Ford, and has placed the Ford Motor Company in the position of performing a public service to the people of Canada.

It has definitely made Ford products a national institution—being such, the Ford Motor Company believes it is justified in telling the public it serves how the present low price of Ford Cars can be maintained in 1923.

# How the Present Low Price of Ford Cars Can Be Maintained in 1923

We are absolutely frank with the public when we say that the present low prices are not justified by present production but only by the production it is hoped will result from them.

The present low prices for Ford Cars are based on maximum production only. To-day's market on steel and other raw material that goes into the manufacture of Ford Cars will not warrant these prices except at peak production. Ford prices must go up unless they are justified by increased production.

### Everybody's Business

The Ford Car is Everybody's Car—the Ford business is everybody's business. You and your neighbor, and his neighbor are all vitally affected by the price of

If you are at all concerned about buying a Ford this year, make it your business to let the Ford Company know about it.

This merely signifies your intention to buy a Ford Car and obligates you in no manner to buy. The Ford Company must know how many cars are

I understand that Mr. Ford and the Ford Motor Company have reduced the price of Ford Cars to a point never before conceived to be possible, and that these prices are not justified by the present volume of business, but that they have to bring about a larger volume of business to justify these prices.
