

HUSBAND SAVES WIFE

From Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Pittsburgh, Pa.—"For many months I was not able to do my work owing to a weakness which caused backache and headache. A friend called my attention to one of your newspaper advertisements and immediately my husband bought three bottles of Lydia E. Pinkham's Vegetable Compound for me. After taking two bottles I felt fine and my troubles caused by that weakness are a thing of the past. All women who suffer as I did should try Lydia E. Pinkham's Vegetable Compound."

Mrs. JAS. ROSENBERG, 620 Knapp St., N. S., Pittsburgh, Pa.

Women who suffer from any form of weakness, indicated by displacements, inflammation, nervousness or "the blues," should accept Mrs. Rosenberg's suggestion and give Lydia E. Pinkham's Vegetable Compound a thorough trial.

For over forty years it has been correcting such ailments. If you have mysterious complications write for advice to Lydia E. Pinkham Medicine Co., Lynn, Mass.

TRILBY SHOE CREAM

Schiller, Isben, Oliver Goldsmith, Oliver Wendell Holmes, Sir Arthur Conan Doyle, and Dr. Robert Bridges, the Poet Laureate, are among the famous poets and authors who have been medical men as well.

The idea of farmers' co-operative societies is not new. Sixty years ago a convention of farmers at Centralia, Ill., discussed plans for wholesale buying and selling agencies for their co-operatives in agriculture.

Pittsford Island, situated in the Pacific, almost midway between Australia and South America, is probably the most isolated inhabited spot in the world. Sometimes a year passes without the arrival of a mail. Letters are sent from the United States by way of San Francisco and Tahiti, and these lie at the latter place awaiting some vessel that will touch at the island. It once happened that only two vessels called there during a period of twenty-six years.

Farm Wire Fencing

LARGEST LUMBER ORDER EVER GIVEN

Money Deposit When Notice of Wedding is Given.

For the building of cantonments the United States government placed the largest lumber order that has ever been given, involving the purchase of 775,000,000 feet of southern pine.

One of the British co-operative societies had paid over \$2,000,000 in benefits to its members who are in war service.

It is officially estimated that every soldier of the British Army costs the nation between \$1,250 and \$1,500 a year.

Robert Burns wrote his immortal poem, "To Mary in Heaven," lying full length under a haystack in the middle of the night.

Pennsylvania is now mining approximately a quarter of a million tons of anthracite coal every day to meet the wartime demand.

Oyster shells are being used extensively in the manufacture of Portland cement along the coast of the Gulf of Mexico.

A certain English village requires a money deposit when notice of a wedding is given, when deposit is returned if no confetti is used.

Many years ago Paris had a newspaper which was regularly printed on squares of white linen, in order to avoid the exorbitant tax on paper.

A New York medical scientist has invented an ingenious light which the physician may hold in his mouth and thereby leave his hands free for the purpose of making examination.

It has been discovered that paper pulp of excellent quality can be made from the leaves of the magney plant, which grows extensively in Mexico and the Central American countries.

The school children of Korea make use of shallow boxes of sand instead of slates. They draw the characters with a sharp stick and when the box is shuffled it is ready for another character.

Schiller, Isben, Oliver Goldsmith, Oliver Wendell Holmes, Sir Arthur Conan Doyle, and Dr. Robert Bridges, the Poet Laureate, are among the famous poets and authors who have been medical men as well.

The idea of farmers' co-operative societies is not new. Sixty years ago a convention of farmers at Centralia, Ill., discussed plans for wholesale buying and selling agencies for their co-operatives in agriculture.

Pittsford Island, situated in the Pacific, almost midway between Australia and South America, is probably the most isolated inhabited spot in the world. The speed of animals.

He is "slow as an ox," or "fleet as a deer," or "as fast as a horse," or "as swift as an antelope."

How many times have you heard these expressions, which bring to mind the question, "How fast do animals move?" Few know just how fast or slow they are, but an interesting computation by scientists is designed to throw light on the matter.

A riding horse covers forty inches while walking, while at a jog trot it covers eleven feet in a second. The two minute horse, forty four feet in a second. The leisurely ox moves over only two feet a second when hitched to a wagon and about twenty inches when attached to a plow.

The elephant, which can pull more than six horses, only about four and one-half feet a second, and running as rapidly as it can is able to travel eighteen feet a second.

The lion is claimed to run faster than the swiftest running horse, which is from 80 to 100 feet a second, according to the country through which it is compelled to travel.

Some claim a hare can travel at the rate of sixty feet a second while others claim it cannot travel more than half that distance. All deer are speedy animals. A roebuck has been known to cover seventy-four feet a second when pursued by dogs. The giraffe is said to pass over the ground at the rate of about fifty feet a second, while the kangaroo covers ten to fourteen feet a second. A tortoise five inches long makes about a half-inch a second.

All in Uniform.

First Officer (in uniform of jealousy): "What the knock-kneed chap with your sister."

Second Officer: "My other sister."

DANGER LURKS IN EVERY ONE OF US

We Are As Full of Deadly Poisons As A Germ Laboratory.

AUTO-INTOXICATION OR SELF-POISONING

"FRUIT-A-LIVES" Absolutely Prevents This Dangerous Condition.

The chief cause of poor health is our neglect of the bowels. Waste matter, instead of passing from the lower intestine regularly every day, is allowed to remain there, generating poisons which are absorbed by the blood.

In other words, a person who is habitually constipated, is poisoning himself. We know now that auto-intoxication, due to non-action of the bowels, is directly responsible for serious kidney and bladder troubles; that it upsets the stomach, causes indigestion, loss of appetite and sleeplessness; that chronic rheumatism, gout, pain in the back, are relieved as soon as the bowels become regular; and that pimples, rashes, eczema and other skin affections disappear when "Fruit-a-lives" are taken to correct constipation.

"Fruit-a-lives" will protect you against auto-intoxication because this wonderful fruit medicine acts directly on all the eliminating organs. 50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent on receipt of price by Fruit-a-lives Limited, Ottawa.

ARE NOT GIVEN TO MARRYING.

Rochester Post-Express.

A canvass to discover how many women are available for war work is said to show that there are practically no unmarried waitresses and few unwedded actresses; while scarcely any of the women glorified in circus posters as acrobats, wire walkers, and the like, are the misses or mademoiselles their poster names advertise them to be. On the other hand, so vast a majority of women teachers are spinsters that girls who choose that honorable and useful calling may also be said to leave matrimonial hopes behind them on entering the schoolhouse door.

It must, of course, be borne in mind that when young school-ma'ams marry they drop out of the profession, and only the unwedded remain. But this does not alter the fact that school-mistresses are either less vulnerable to Cupid's darts, or less exposed thereto than any other class of women workers.

Several reasons suggest themselves in explanations. Their vocation gives them position and financial independence. They come less in contact with males of marriageable age. They see as much of children as they wish to—sometimes more—and often become cynical of the virtues of masculinity, old or young. There are also women of good minds, too wise to be inveigled to jump with unreflecting haste from frying pans of single blessedness into matrimonial fires. Their occupation tends to make them creatures of routine, content with the grooves in which they run; and finally they exercise and their habits of doing all the talking and much of the thinking for their pupils naturally tend to make them autocratic, uncompromising, indolent and often somewhat intractable, unamenable and austere.

Generally speaking, also, only the wise man really feels attracted to a woman wiser than himself; and as most men are not wise, and as many wise men do not marry, the matrimonial chances of the school mistress are slenderer than those of the waitress, the seamstress, the factory worker, the office ornament, the trapeze performer, the type writer, the actress, or the nurse.

It seems unfortunate for men who would found families that the women who are surpassing qualified to rear the tender and teach the young idea how to shoot find the sheltered life less alluring than pedagogical careers. But it is the training of a child is a woman's wisdom, as we are told, the training of a roomful of them may be the more important work to which the cultivated woman of our age are called. In any event, the woman who prefers marriage to missions and cradles to careers may know by statistics the vocations they should wisely choose.

COSSACKS ARE NOT ALL SOLDIERS

Australians Said to be the Greatest Meat Eaters.

On the tombstone of a photographer buried in an English rural cemetery is inscribed: "Here I Lie, Taken From Life."

Careful copies are kept of all letters written by King George in person, and these are preserved in the archives at Windsor.

The greatest meat-eaters are the Australians, who, before the war, consumed an average of more than seven pounds per head weekly.

Mr. Lloyd George has a salary of \$25,000 a year as First Lord of the Treasury, but is unpaid for his services as Prime Minister.

The British army spends half a million dollars a year for the paste with which to polish the brass buttons on the soldiers' uniforms.

The freight cars in use on the railroads of the United States; if placed end to end, would stretch continuously for over twenty thousand miles.

The single tuft of hair left on the shaven head of a Mussulman is supposed to be left for Mahomet to grasp hold of when drawing the deceased into Paradise.

Without a note purely from memory a blind girl wrote a verbatim report of a sermon lasting three-quarters of an hour, which was delivered in All Souls' Church, in London.

Cossacks are not all soldiers. A Cossack is merely a peasant proprietor who holds his lands on a feudal tenure which obliges him to appear, when summoned, armed and mounted and ready for war.

Arctic explorers and other persons who have to do every hard work under extremely trying climatic conditions invariably develop an intense craving for sugar, and eat enormous quantities of it.

The strength of a modern steel ship is largely the sum of the strength of many rivets. For no matter how strong the framework and plates that go to make up the hull maybe, if the rivets are weak the entire structure will be weak.

The railway system of the United States, now under control of the Federal Government, is equal in length to that of all Europe and Asia combined, and the tracks, if strung out in a continuous line, would suffice to run a girdle of steel eleven times around the globe at the equator.

One of the recently discovered wonders of the vegetable world is the soap-mut tree. A native of China, it produces a nut, the husk of which makes a perfect lather, and may be used as soap. The kernel yields a crystal-clear oil that for cooking purposes is equal to the best olive oil.

One of the battalions which took part in the recent capture of Jerusalem was the "Royal Scots." This regiment is probably the oldest line regiment in the world, and possesses the title of "Pontius Pilate's Body Guard." The origin of this strange name is the legend that they are descended from a body of Scotchmen who were drafted into the Roman service and posted in Jerusalem at the time of the Crucifixion. And now history repeats itself and the regiment is to be found on duty in the Holy Land.

TO KEEP OUT THE FLIES.

Any order pleading to man is offensive to the fly and vice versa, and will drive them away.

Take five cents' worth of oil of lavender, mix it with the same quantity of water, put it in a common glass atomizer and spray it around the room where flies are. In the dining room spray it lavishly over the table linen. The odor is very disagreeable to flies but refreshing to most people.

Geranium, mignonette, heliotrope and white clover are offensive to flies. They especially dislike the odor of honeysuckle and hop blossoms.

According to a French scientist flies have intense hatred for the color blue. Rooms decorated in blue will help to keep out the flies.

To clear the house of flies, burn pyrethrum powder. This stupefies the flies, but they must be swept up and burned.

The Husband.

The Wife: "There goes Mrs. Tompkins' husband—'s one of the old 'consumptibles'."

The Wife: "All husbands are consumptibles!"

British at Their Best

When They Are Fighting With Backs to the Wall.

THE British have reached the strategic position in which their enemies have never found them the most dangerous, says the Philadelphia Public Ledger, in a notable tribute to British valor.

"With our backs to the wall," says Italy.

"With our backs to the wall," said Wellington at Torres Vedras. Overwhelmingly outnumbered, with all Spain in the hands of his enemies, with four armies confronting his single and isolated force, he fought them off and finally drove them, battle by battle, over the Pyrenees. From Torres Vedras the British soldiers fought their way, triumphant, to Lisbon, meeting and beating the most famous generals of their time, the marshals of Napoleon. But their splendid push to Madrid and northward did not really begin until they had braced their backs against the famous "wall" of Torres Vedras.

"With our backs to the wall," said Dr. Hawkins and "My Lord Howard" when the Spanish Armada came riding into sight and interrupted—never commanded, and never can command, such odds against the English.

Counting by tonnage, these intrepid sailors stood on the cliffs of England and saw the command of the sea already lost. The hammer-strokes of vastly superior strength poised above them, ready to shatter what was then almost the only citadel of liberty in the world. But these unconquerable British, who never know when they are beaten, had their "backs to the wall," a fatal attitude for their foes to find them in. They put to sleep in the spirit of Sir Richard Grenville and his little "Revenge," who had just fought "the fight of the one and the sixty-three," and faced these "great sea galleons beaving on the weather bow." History records the sequel. By all human reckoning the British should have been beaten. But—but—well, their backs were to the wall, where a Briton is unbeatable. That is British character. We know it in this country; for it was John Paul Jones, a sailor whom we borrowed from Scotland, who, when things looked black enough with him, sent the message over to his antagonist: "I have just begun to fight."

We know it on this continent; for it was the Canadians of British origin who held the line for days after the villainous gas attack at Ypres—held it with a few lean companies whom the Germans could have easily overwhelmed by sheer weight of numbers if they had dreamed that these astonished veterans from overseas would stick so stubbornly without heavy reserves in support. The Canadians, in the same thing at Hart's River, in South Africa, firing—firing until the last man lay wounded.

That was the spirit of the Haig message: "Every position must be held to the last man." Waterloo was a battle fought by the British army with its back to the wall. That Waterloo campaign is worth thinking of at a moment in these anxious hours as we wait for the news from this colossal "Waterloo" whose Titanic wrestlings may well shake the earth to its center bulwarks.

The Germans retreated from Ligny while the British held their ground at Quatre Bras. The British only withdrew to Waterloo, where the Germans had failed to hold the line. At Waterloo, the British held again; and if they had not held, the Germans would only have come up to fall into a trap.

The Haig message has not only stiffened the weary ranks of his hard-bested army, but it has sounded like a trumpet-call across the allied world to heaven the watching millions who knew so well what they each personally have at stake in this terrible struggle. The British armies stand as the bulwark of democratic liberty. We all know only too surely in what a tragic position the defenders of democracy would be if the Anglo-French armies found themselves unable to date back this renowned Teuton tide. To say—as our writers so often repeat—that as that is at stake today as long as the British version of this universal message of inspiring leadership—encourages us all with the sure knowledge that the best blood fighting races in the world—the Anglo-Saxon and the French—have risen to the sublime pitch of Valour and will not let them "pass." We record our confidence that two such armies—two such nations—cannot be beaten.

Australian Woods.

Although Australia has a very small area of forest land as compared with other countries there is a great variety of ornamental woods of rare and beautiful grain, but little known outside the Commonwealth. In fact it is within comparatively few years that the Australians have recognized the possibilities of their natural resources.

Minister Was "Exempted."

Hon. P. B. Carrol, Minister of Public Works, appeared in person before the Ottawa Court of Exchequer and secured exemption from payment of \$500 war tax. He said this amount would be paid by him in his home town in New Brunswick.

Glasses and French.

The near-sighted humorist happened to bump a pedestrian, who had a grouse. "Take off them glasses and I'll punch your face for you," he cried. "But my dear sir," said the humorist calmly, "it is quite against the custom you know. Whoever heard of ordering off the glasses before the punch was served?"
