Crockery and Glassware

This is not the only store that sells crockery and glassware in this state, but it is the only one that sells reliable crockery and glassware.

It may be news to you that a cup and saucer made of the same material, and finished in the same way, may have two grades—"firsts" and "seconds." This is caused in the making, firing and handling of the cup and saucer. The cups and saucers that come out of the process best are "firsts" and the next are "seconds." It is the same with glassware. We carry the best only.

But when we offer you the best crockery and glassware at this store, it is the best. Inspect our stock, compare our prices with those of any other store—then look at the quality.
