LIGHTS IN THE WORLD

A speaker at the Student Volunteer Convention referred to a recent experiment in which a sensitized plate was placed in the lens of a powerful telescope and exposed for twenty-four hours to the rays of light from the distant Milky Way. At the end of that period hundreds of thousands of stars were photographed on the plate. Each of these stars is in reality a sun and the centre of a system. The astronomer discovers in that white streak of light an uncounted number of brilliant luminaries, unseen by the unaided eye. So each life, however obscure, may be a light in the world. "The spirit of man is the candle of the Lord." The Son of God is the Light of the world. IIe lights multitudes of souls and sets them in their own place to scatter the world's darkness. You may be a light in the world, even if only a little, unnoticed light. Are you?
