MONEY MARKET.

TOHERE has been a somewhat increased demand for accommodation at the Banks, but we do not learn that there has been any difficulty in obtaining the required accommodation, nor has there been any advance asked in the rate of discount. Sterling Exchango is quiet at last week's quotations.

Gold in New York has been steady at about 1404 during the week, closing yesterday at that figure.

Silver is somewhat less abundant, the buying rate being now 41 to 41 per cent discount.

The following are the latest quotations of Sterling Exchange, &c :--

QUIERE is still very little to report as to movement I in this department. Some few parcels have been nale, and those houses who have travellers out are receiving some orders, but it is altogether too early for a general movement.

Reports still come forward that stocks are large in the country, and travellers are sending home only sorting parcels, which shows, as we before indicated. that the early trade would be a light one. The condition of the country, however, is sound and healthy. and crop prospects on the whole are favourable. Still we continue to advise caution, and the giving up on the part of country merchants of the tendency to over trading.

Imports continue to come forward freely, and although they are not up to the receipts at same time last year, they are yet, in our opinion, larger in amount than they should be.

Present appearances indicate that in two or three weeks at latest stocks will be well forward. Some houses are even now opening portions of their stocks, while others, thinking it too early as yet, are putting everything in bond.

There is a little demand for some classes of cottons; we notice some respectable orders for low-priced grey and white cottons, and also for low-priced prints.

Thus far there has been only a very limited enquiry for imported Woollens, which we fear will be again an over supply unless great care be exercised.

In prices Cottons have been very steady, varying but little, sometimes up a farthing per pound, and then again down about the same.

There is nothing special to report about Woollens. Any change will probably be in favour of the buyer. The Wool crop in Australia and Brazil is reported as caormously large, and this must ero long affect prices

In Linens heavy goods show a decline from last year, while goods made from all flax and fine goods are about the same.

Silks are not likely to be cheap this season. The supply of raw material last year was insufficient, and should it again fall short this year prices must advance considerably.

Fancy goods are beginning to arrive, but few have as yet been opened out; from this forward stocks will rapidly improve in assortment, and be quite complete by the end of the month.

THE HARDWARE TRADE.

A RADE continues dull, with very little doing except in leading articles.

lots just arrived at a trifle under our quotations, but i stocks low.

principal holders are now holding for full rates, and some asking even more than this. The summer fleet having all arrived, prices are now pretty certain to advance. By end of next week, all large lots will be stored.

BAR Inon -Some large lots have been sold at £12 per ton. Leading holders are now asking L12 10s. and inclined to hold rather than sell at less prices. There is by no means an over stock.

CUT NAILS -Are firm as quoted, no less price will be taken this fall. There is already a scarcity, and orders for five hundred tons have been received within the past few days for Cuba. Further orders are now offered for Australia. It is anticipated the mills will be kept fully employed.

CANADA PLATES .- Are firm at quotations. TIN PLATES -Are dull and prices favour buyers. Surly Goods.-Are in full supply. Prices are rather firmer than they have been.

WE have a quiet week's business to report, with very little doing except in the very little doing except in teas.

SUGAR-Has had some enquiry, but we do not hear of any transactions beyond retail amounts. Prices are steady, and if anything, favour holders.

Molasses .- Quotations are quiet and mchanged, but are firmly maintained for Centrifugai and Muscovado. Refined Syrups without change.

TEAS-Have been in request for Twankays, Young Hysons and Uncolored Japans, and transactions to a considerable extent are reported at about the range of our quotations.

COFFEES-Are quiet and prices are unaltered.

FRUIT.-Raisins, both bunch and layer, are neglected, but prices are nominally without change.

Fisit -There is little demand, and transactions are only in retail lots at previous quotations.

SALT - Liverpool Coarse is in rather better request, and prices are stiffer, but as arrivals to a considerable extent are shortly expected, no marked advance can well be lot "ed for.

Rice-is inquired for, but holders are asking more than buyers appear willing to give, and transactions consequently are limited.

THE LEATHER TRADE.

Hua & Richardson. | S Scymour, C. E. | Si Smyth & Edminso

W E are unable to report any particular change dur-W ing the past week, unless, perhaps, a slight falling off in the demand for stock, the receipts, however, have not been excessive, and there is no glut in the market.

SPANISH Sole-Rules very steady, with sales fully coust to receipts.

SLAUGHTER SOLE- Continues neglected, there being little or no demand, prices are weak.

HARNESS-Is inactive, but prices remain as last quoted The stock is not large.

WAXED UPPER-Has been in better request, and sales of all arriving are freely made at quotations.

GRAINED UFFER-Is quiet, the demand the past week having been limited.

BUFF AND PERBUED-Have moved off more freely. considerable sales of choice stock having seen made at full prices.

PATENT AND ENAMELLED -There is no improvement in the demand for these stocks.

CALFSKINS -Some little call has existed for small parcels, but apart from this there is no change.

Sprits-Are still in good demand, with only a limited quantity offering.

Superskins - Light are in moderate request, with less demand for medium and heavy

Hinrs.-We notice a slight decline in the New York market, which, if continued, may cause a de-Pro IRON.—Considerable sales have been made of clension in prices here, at present prices are firm and

Kirkwood, Colson & Livingstone & Co.

LOUR. - Receipts have been light and transactions unimportant. Small and transactions unimportant. Small and gradually diminishing stocks keep the market firm and steady, but purchases are made sparingly, no disposition shown to lay in except as actually needed. We have no improvement in demand or prices to note in the higher grades. Superfine has maintained an almost unbroken uniformity throughout the week. The city demand falls mainly on Strong Supers, from Canada wheat; price ranging from \$7 75 to \$3, according to strength and sponging qualities, the preference being given to the better samples, even at extreme prices. Ordinary ranges down to \$7.50. Some few parcels of Welland Canal have been taken for Quebec at \$7.50 to \$7.55. The low grades are in full supply, and have engaged little attention; rates may however be quoted as nominally unchanged Rye Flour, though now in small compass, is a slow and increasingly precarious sale, only a few limited transactions at \$5.90 to \$5.95 from wharf and store can be noted, Bag Flour is quiet but steady, the demand is small, and though the supply is almost wholly from the local mills there is ample for the restricted demand of the trade.

OATMEAL -There is very little offered, and those holding good brands demand from \$6 to \$610, but few if any sales over \$6 can be noted.

GRAIN - Wheat .- Receipts have almost wholely ceased, the few straggling cars coming forward being mostly direct to millers, hich, with last week's advance in Flour, has aided prices, and rather more. say \$1.55 to \$1.57], is now obtainable for U. C. Spring. Pease -The supplies continue small, but as the engagements of shippers have been mostly completed, there is less competition, and though rates are not quotably lower, former prices are now difficult to socure. Oats-Are scarce, and for city consumption command in a retail way 46c to 47c; 45c is still the ruling figure for round parcels

PROVISIONS .- Pork-Little business can be noted: the market is firm, and full rates secured for the little changing hands, but boyond the merest consumptive wants, there is no disposition to accumulate stock Lard-Continues quiet, only retail sales taking place. Cutmeats-Are yet in overstock, and rates are relatively low, and most irregular, owing to the great diversity of style, quality, condition, &c. Butter-Continues neglected. British advices, except for choice and in prime condition, are most discouraging, and rates said to rule can only entail loss and disappointment at any price obtained. Liverpool advices report late sales of New Canadian at 48s 6d to 50s per cwt, and a couple of small lots of prime at 81s, while old is reperted abundant, and a difficult sale at 28s. to 40s.

Asnes .- Pots-Have ruled steady, and with small receipts competition has forced prices up a few cents per hundred Pearls-Show such heavy receipts of late, that buyers fear to continue operations, and there being only one or two buyers in market, prices have continued to decline, closing, however, rather more steady; latest sales have been at \$6.80 to \$6.90 for light to heavy tares.

Of the grain trade of the lake ports the Toledo Bl. de remarks: "The early shipments of wheat from this point created quite a furore among eastern millers, and the rapidity with which orders have since arrived betaken a very active trade during the fall. The quality of the grain is the best over shipped from the west, and not a particle inferior to the best ever grown on the continent—in fact, it could not be better. The spleudid quality, together with the prolific yield through the country tributary to Toledo, will make this a favourite point with eastern buyers, and this city will, to a great extent, monopolize the trade in winter wheat for the next twelve months at least." The wheat crop of the country, now generally harvested and mostly in good condition, is estimated in the aggregate at not lar from 210,000,000 bushels for the wheat product of 1867—about 60,000,000 more than that of 1866.

ANOTHER DISCOVERY—In digging a well on his farm, a few miles above this town, Mr. J. J. Wright, of the Huron Hotel, has discovered a sulphur spring, the water of which is pronounced to be very similar to that from the famous St. Catharine's mineral springs. Sieps are being taken to have the water properly analyzed. If it proves to be what is expected, it will be a discovery of very great importance to Goderich, as we have every other requisite for a great watering place. Goderich seems to be favored by nature oven beyond what was ever anticipated.—Signal,
