36/52 CATARRH. A New Home Treatment for the Cure of Catarrh, Catarrhal Deafness, and Hay Fever.

The microscope has proved that these diseases are contagious, and that they are due to the presence of living parasites in the lining membrane of the upper air passages and eustachian tubes. The eminent scientists - Tyndall, Huxley and Beale - endorse this, and these authorities cannot be disputed. The regular method of treating these diseases is to apply an irritant remedy weekly and even daily, thus keeping the delicate membrane in a constant state of irritation, accompanied by violent sneezing, allowing it no chance to heal and as a natural consequence of such treatment not one permanent cure has ever been recorded. It is an absolute fact that these diseases cannot be cured by an application made oftener than once in two weeks, for the membrane must get a chance to heal before any application is repeated. It is now seven years since Mr. Dixon discovered the parasite in catarrh and formulated his new treatment, and since then his remedy has become a household word in every country where the English language is spoken. Cures effected by him seven years ago are cures still, there having been no return of the disease. So high are these remedies valued, and so great is the demand for them, that ignorant imitators have started up everywhere, pretending to destroy a parasite - of which they know nothing - by one of the results of the application of which they are equally ignorant. Mr. Dixon's remedy is applied only once in two weeks, and from one to three applications effect a permanent cure in the most aggravated cases. N.B. - For catarrhal troubles peculiar to females this remedy is a specific. Mr. Dixon sends a pamphlet describing his new treatment on the receipt of one cent in stamps. The address is A. H. Dixon & Son, 324 King Street West, Toronto, Canada. - Scientific American.

You can easily make your own fly-paper. Mix equal parts (by measure) of melted resin and castor-oil. With knife or straight-edged instrument, slightly warmed, spread evenly and thinly on paper that is not porous. Foolscap, for instance, is good for the purpose. Pin the paper thus prepared on a larger piece of newspaper, and lay out upon shelves or tables where flies are troublesome. When covered with flies, burn, and replace by another fly-paper. ROYAL GOFF, of Willsboro', N. V., suffered two years from a hard cough, with severe pains in the side and chest and raised large quantities of blood. Several physicians tried in vain to relieve him. Three bottles of WISTAR'S BALSAM OF WILD CHERRY cured him.

STRAWBERRY ICE CREAM. - One of good cream, about two cups of sugar and one quart of strawberries. Crush the fruit, add the sugar, and stir until dissolved; then add the cream. Rub through a sieve and freeze. This is often called Philadelphia ice cream. It is essential that the ice and salt be carefully measured in freezing - one tin cup of salt for every two of broken ice. It will take twenty minutes to freeze. When it has stood about five minutes stir as fast as possible. This is delicious.
