

says that there are "not a dozen American medical colleges out of 117 that would be tolerated for a moment in any country that pretends to be civilized;" and this despite the efforts of the best men in the medical profession, which are openly combatted or secretly thwarted by quacks, charlatans and low-class colleges. It clearly is not for want of degree-granting colleges that the American doctor is less informed than his brethren in other countries, for it seems that taking the average of all other countries as a fair average, there are schools enough in America to educate medical men for 300,000,000 people, but in most of them the standards for matriculation and graduation are put down so low as to make an American diploma almost a reproach in other countries. It will be remembered that Dr. Rauch, of the Illinois Board of Health, visited Montreal during the small-pox epidemic that raged in this city some years ago. Dr. Rauch was able to speak in terms of high commendation of the general sanitary regulations of Montreal, and the means it has at command for coping with zymotic disease. Dr. Rauch, it seems, put up a young journalist of Springfield, Ill., to try for a medical diploma from the Bellevue Medical College, Boston, Mass., the president of which was a rabid anti-vaccinationist. The diploma was granted, and the reader will be interested by the perusal of the thesis on the strength of which this license to kill was issued.

VACCINATION.

The Grate increase of Disease in these Late years Calls for Explanation Undoubtedly the Doctors of this day is to blame for very much of it. But more than anything Else in my opinion is the Inseartion into the Pure Blood and Vitle fluid of our Inosent offspring of that vile Diseas of the Animals cowpox So grate has the Curse Became that Privelidges of School Edication is Denide in this and Many other States to those who wisely Refuse to Submit to this Curse that is just a Peace of the Nonsensikal Medical teachings of the Day when Theory and Imagination Rool instead of Practical Expearance and which keeps its Students in close Confinement a Big part of three or four years to hear the Nonsens which is thear peddeld out to them consumption Siffles and Skin Disease Runn Wild among the People This calls for a Strong kick on the Part of our noble Profession which should seek to Build upp the Health and Streangth of the People instedd of Planting the Seeds of Diseas in them To Prove that Vaccination Don't do no good we need only to say that Thear has Been More Small Pox in this Place in the last
