

The Oxford Hot Water System of heating operates with perfect silence, as the Oxford Radiators are planned to give a clear passage for the water. They do not contain diaphragms or other obstructions in the water passages to check the water and cause the system to be noisy.

The efficiency and durability of

OXFORD RADIATORS

have been absolutely proven by years of successful use.

Oxford Radiators are cast of the very best quality of iron in mechanically accurate moulds.

There is no paper packing used in the joints, and each connection is made with the Oxford Push Nipple which assures it against leaks.

Oxford Radiators are so designed as to readily lend themselves to any scheme of decoration.

In the Oxford Hot Water Boiler we have in combination the latest and best discoveries of modern practice in heating.

Our entire plant at Toronto Junction, covering many acres of ground, is devoted exclusively to the manufacture of Oxford Hot Water Boilers and Oxford Radiators.

We would like to send you some of our Booklets about the Oxford Hot Water System of Heating—they tell the whole story.
