IN A FEW DAYS WILL BE ISSUED,

In one large, handsome octavo volume, beautifully illustrated,

THE YEAR BOOK of AGRICULTURE; or, the ANNUAL of AGRICULTURAL PROGRESS and DISCOVERY for 1855. Exhibiting the most important discoveries and improvements in Agricultural Mechanics, Agricultural Chemistry, Agricultural and Horticultural Zoology, Meteorology, &c., together with Statistics of American Growth and Production, a List of recent Agricultural Publications—Agricultural Patents, with Notes by the Editor on the Progress of American and Foreign Agriculture for the year 1855. By DAVID A. WELLS A. M., Member of the Boston Society of Natural History, formerly Chemist to the Ohio State Board of Agriculture, Editor of the Annual of Scientific Discovery, Familiar Science, etc. etc.

The object contemplated in the preparation and publication of the Year Book of Agriculture, is to aid in the progress and development of that science upon which the prosperity of the country so eminently depends.

As the work is intended for the use of all who feel an interest, either directly or indirectly, in agricultural improvement, it has been the aim of the editor to make every article brief and intelligible to all; and to make no statement except upon the most approved authority.

Each volume will contain an elegant steel portrait of some distinguished agriculturist, together with numerous fine illustrations of recent mechanical improvements pertaining to agriculture, stock, fruit, &c.

Each volume will also contain a series of ELEGANT COLOURED ENGRAVINGS illustrative of the great staples of American agriculture.

The Year Book of Agriculture will be published, annually, in October of each year, and will form a handsome octavo volume of about four hundred pages.

PRICE, in substantial cloth binding, 7s. 6d. On receipt of 7s. 6d. a copy will be forwarded by mail, postpaid.

CHILDS & PETERSON, Philadelphia. Orders received and executed by HEW RAMSAY, Montreal.
