

In the case of evolvement of cellular systems in either country, the reliable service area of cells (defined for the purpose of this arrangement to be 35 dBuV/m at the cell perimeter) will not extend across the border. In any case where the interference contour of a cell (defined as 3 times the radius of the cell) would fall across the border, the responsible Agency will coordinate such cases with the other Agency prior to authorization.

The coordination procedure will be in accordance with the principle of equal access to the spectrum. The definition of reliable service area may be revised by mutual consent.

6. Protection of Television Reception

In order to provide protection to the reception in Canada of certain Canadian television stations from interference, the FCC agrees to withhold authorization of the operation of land mobile base stations in frequency bands and geographical areas listed in Annex B. The agencies reserve the right to initiate further discussion on Annex B.
