

EQUIPMENT

Due to the large number of visitors (@8,000) who passed through the aisles at Sea Fare International 1992, opportunities were available for many of the firms with booths were promoting various lines of equipment for the fishing industry. Equipment exhibitors at the show featured packaging and weighing equipment; cooling and freezing systems and storage; processing and holding systems; and other miscellaneous equipment aimed at seafood processors, exporters, retailers and foodservices representatives. Attending major seafood trade shows provides the opportunity to make contact with a large number of equipment manufacturers and sales representatives.
